

# Creating My First Waterfall in Animal Crossing

- Alejandra M.

In the game, about a day ago I just got the Island Designer App which helps me plan and create waterfalls and cliffs in my island. I decided to create my first waterfall, after watching a few tutorials on Youtube I wanted to give it a try. I'm still not sure about the placement of the waterfall but I tried! At end, I planted some flowers in the corners of each side of the waterfalls I created (4) and added a log bench as well.

Waterfalls are all done! Still not sure about where I placed them.
