# Form and Communication / Creative Work

**Saving your files:**

Save your InDesign file as:

COMD1167_LastnameFirstInitial_pattern

Then save again as a PDF:

Go to File > Export > Adobe PDF (Print)

Add finished PDF to Drive

**Part I: Typographical Patterns**

**5th column: Typographical Pattern**

**Columns 1 to 4**

Create an all over pattern with a letter (ONE LETTER, related to performer, we will discuss the project in class)

- It is ok to use cap or lower case letters
- NO other elements other than the letter itself can be included
- Create a square that encompasses the four left columns that is 47p wide, 45p tall.
- Using the technique we will cover in class, mask out the area that will contain the pattern. Be sure to give the box a stroke.

Use our grid this way.
Use 1pt border in the 4 column area to the left  (5th column for headings)

type and patterns
