“Society’s Dreams and Actuality”

In my vision I wanted people to see the different views of the way society treat women and men and how society doesn't show that or how their just let it go on. In my illustration I show how women and men are in a Fantasy and in a Reality. It shows that the line being society that separates the fantasy from the reality and Symbolize the like as the “Glass Ceiling” that separates the two ideas. After watching my Pop Culture I learned that society has becomes normalized by the the way their treat us women. Even women are oblivious to this mistreatments. The video influenced me to take more action by spreading the word to other women and by artifact I've learned that society has not respect the value of Women. It showed the amount of things women contribute to society and what men contribute. Also shows the different ways their rewarded differently by society. It made more aware of problems that we tend to normalize. Difficulty I experienced was a way for people to understand what I was trying to say and the way I would of portrayed it for other people to really understand. I eventually found a exploratory way to show the meaning of the video through my perspective by showing what we should have and what we actually do have. For example I use math symbols in my art so it can be easier

to evaluate. And also used certain color for certain meanings. Overall it worked out well. The Title of this piece would be "Society's Dream and Actuality". I picked to do the art because I believe people learn easier through visuals and we actually feel what I'm saying cause their can have different ways of seeing it. Throughout school I've learned that some people are word learners and others are visual learners. In my artwork I used Cartoon like type of art because it would be more a amusing and appealing to many other eyes. Main idea is to make society aware and let them know being aware is a small change that will have a big impact later. While creating my artwork I learned some facts I didn't really know before. For example I learned that women in some business actually gets a pay cut rather than a raise. No my project didn't turn out how I expected because it took me a while to do it and I was so worried about my art but I feel like it has a powerful meaning to it still. Throughout this project I've learned that writing is a useful way to teach people things but Visual aids are way better. Additionally, us women need to stand up for what's right and it's not a day change it's a everyday change. Not only women have to stand up Men can also help change the in justice.
