

Hi everyone,

You can now find the following grade information in the OpenLab Gradebook (if you'd like to know how your grade for the course is calculated, [the grading policy can be found here](#)):

- **Project (out of 100).** Grade is based on [Parts I-IV of the Numerical Methods Project](#).
- **OpenLab / Participation (out of 100).** Based on OpenLab assignment "Advice from the Past" together with class participation. Extra credit was available on the OpenLab assignment, so a score greater than 100 is possible.
- **WeBWorK (out of 100).** To receive 100, you must have completed 90% of the assigned WeBWorK – if you completed more than 90%, your score will be higher than 100. In addition, there were two Optional assignments over Spring Break, and these points could also increase your score beyond 100.
- **Course Average - all except final exam (out of 100).** This gives your % in the course prior to the Final Exam — it includes your three class exams, OpenLab/Participation, WeBWorK, and the Project.

Please let me know if you have any questions. I'll see you all this afternoon for the final exam. Good luck!

- Prof. Reitz
