### Homework #1 - Hardware Store/Lumber Yard

I went to a local hardware store called ACE Hardware and the location is 1346 Peninsula Blvd, Hewlett, NY 11557. The type of hardware the store is best at are hand and power tools, lawn and garden, paint, plumbing, housewares, outdoor and cleaning supplies. I got most of the tools from this store since my first semester at City Tech. The staff helped me a lot. They are very helpful and they lead you to the equipments you need and choose the best, cheapest tool you can get. After, they always ask if they need anything else. The staff knew exactly everything was and they were able to tell us which tools or brand is the best one to buy.

ACE Hardware is easy to find but hard to find a parking spot because there are restaurants and supermarkets near them. Once you walk in to ACE, the tools and equipment are on the same path and row as the cash register. There are five columns in the store. The middle is where the hand and power tools are. The ends are outdoor and garden materials. Lastly, in between the end columns and the middle columns are the paint, paintbrushes, plumbing and electrical equipments. They have a rewards card like the one above. I always bring the rewards card with me at all times. They have sales every once a month and before holidays. One negative fact about ACE hardware is that their open hours are from 8am to 8pm but one positive fact about this store is that they open Monday through Sunday.
