Coping With The Loss Of My Dog

Adham Khalil

Department of Entertainment Technology

Introduction:

I chose a short video for the project and the purpose of it is to capture attention as soon as the viewer catches eye on it. My goal is to have the video to have a deep meaningful message to the viewer that makes them feel emotionally attached to it and want to continuously view several times. I've watched many short videos on social media in the past that made me feel like I need to save and watch it many times. I plan on involving myself in the video, ill have a fellow classmate record me while I explain how losing my pet dog changed / affected my life. I expect to capture a viewer's attention emotionally as quickly as possible. This will allow me to learn how to make interesting content and allow more viewers to be engaged in my videos.

Schedule

Task	Start Date	End Date	Duration
Shooting/ Editing Videos	October 10th	December 20th	An hour every shoot. Should be around 6 shoots
Linking Videos into Adobe Premiere	October 13th	December 20th	20-30 minutes to gather up clips and import them into my laptop
Editing the video Together and adding effects and audio	October 11th	December 20th	Each part of the video I edit takes around an hour or 2 , the video will have 6 parts. So 6-10 hours of editing in total.
Adding extra external videos/ pictures	Oct 11th	December 20th	30-1hr locating videos and adding them to the video
Present the Final Piece !		December 20Th	20 Minutes

Process:

The process is fairly simple ;first things first is to setup my camera that ill be using to take my video. Then me and my classmate will talk about how we wan to set up up the video .After that we will shoot the video , Ill have him have him shoot the video for me while I explain my experience of exactly what happened and how my dog passed away. Ill also explain the emotional distress me and my family experienced after our dog passed away. Then after we shoot a couple of shots , because it wont always come out perfect the first time, ill then start up my editing application which is Adobe Premier .Ill then edit and touch up the video in the way I see fit.

Results:

The Results of this Project is a eye catching video to capture many viewers emotional attention. The main point of the video is to show case one of the worst situations me and my family ever experienced in our lives. It is a video explaining how we had to cope with losing our loved pet from start to finish.

Conclusion:

In conclusion the process of creating this video could open a huge door in the future for me because I could use creating videos to create a channel to attract views and potentially earn money that way. This video should attract people's attention because many people enjoy watching videos that effect their emotions and might relate to it.

Methods:

• Shooting the video with a professional camera and Microphone for better audio and video

•Clip/ trimming the videos

•Edit / put together the videos

•Adding effects

•Pulling Audio tracks and cutting and fitting them accordingly into the video

•Using Adobe Premiere Pro Video Editing Software Application

Budget:

Item	Estimated cost	Price Actually Spent
MacBook Pro	$1500	$1300
Paid Photographer	$200	$200
Iphone 16 Pro max	$1600	$500
Bluetooth/Wired Microphone	$150	$85
USB drive	$100	$50
Adobe Premiere Pro	$54.99 a month	Free
Tripod	$40	$29.99

Project Deliverables:
• An eye-catching video
• The effects of me losing my loved pet
• How it affected me and my family
● Schedule of Editing Process
● How I felt emotionally
● A well constructed and edited video of my detailed story

Project Description:

For my project I will be creating a fully constructed and edited detailed video of myself explaining the moment from when I realized that my dog was dying up until he passed away. This affected me very severely because this dog was my best friend and I was the only person who took care of him. It was extremely emotional for me and ill definitely make sure to explain that in the video that I will construct.
