Coping with the loss of my Dog

So far I have shot and edited about 50% of my film. The materials i used were my MacBook Pro, iPhone 16 Pro max, Bluetooth/wired Microphone, Tripod, and Adobe Premiere Pro editing software application. The total amount of money spent on my materials came out to \$3465. So far I have completed acquiring all materials done, filming the first half of the video, and editing the first half of the video as well. What's next is to start to film in different locations, get more detailed about the story of the film, find external sources I can include in the film,edit the film after including all clips with audio and video effects. After that all that's left to do is Complete the video and submit! My calendar consists of things I must get done by December 20th, which is my presentation day. I must shoot and edit more clips into my film, link all my videos into the Adobe Premiere Application, add effects and audio, add external resources, and finally present the final piece! So far I have completed 50% of my video and I will provide a link for you to see my progress half way down the line!
