The opportunity at the internship will definitely benefit me in my career, creating beautiful work using the resources that are available to use is absolutely fascinating. Being able to communicate through this particular medium is what drove me to dive deeper in to the graphic design industry.

I had a great interest in graphic design when I was a toddler, but that interest wasn't fully sparked until my last year in high school, where I joined the yearbook committee to help design the pages in the yearbook. This experience in the yearbook committee showed me the endless opportunities that graphic design has to offer, we are surrounded by graphic design and soaking in the beautiful work of art created by fellow designers truly inspires me to create artwork that will also inspire others to let their imagination run wild.

The opportunity at this internship will definitely benefit me in ways I believe will be invaluable, to be able to do create art and communicate in a unique way would provide me with the skills I need to continue to contribute to my passion. Thank You for considering this gracious opportunity and I look forward to hearing from you.

Respectfully yours,

Andrew Ko
