

SITE REPORT #1B

FURTHER RESEARCH

Choose and revise one of your questions for further research from part 1A of this report.

Revised Research Question:

Why are there multiple entrances/exits all around the area of World Trade Center even if it isn't close to the transportation hub?

Find a book, government document, or newspaper article that could help you answer your question.

MLA Citation for Book, Government Document, or new article:

-Ewing, James. (2011). Bringing space and light to the underground.(World Trade Center Transportation Hub). Architectural Record, 199(9), 74-78.

-STREET-LEVEL ENTRANCES TO WORLD TRADE CENTER TRANSPORTATION HUB TO OPEN ON AUGUST 16. (2016). States News Service, p. States News Service, August 11, 2016.

Why did you select this source? How does it address all or part of your research question?

The sources may be talking the space and lighting due to the designs. It talks a little about how it was planned and why there was a underground connection. It tells you where the entrances are and what is around the area to figure out that it was a means of circulation of busy little areas.

Describe the process you used to find this source including any keywords and the search engine or tool you used to search.

On City Tech library; you can find many articles about the World Trade Center transportation hub but not much about the connections that is all around the area. Some key words I used was, The Oculus, entrances to the Oculus Hub, and pedestrian connection Oculus.

What other sources or further information would you need to answer your question? Where would you look for them?

I may need some information on the plan of redevelopment in the area of World Trade Center. Possible get some videos or more articles on a interview with the architect/engineer.
