

③ Eventually, the techniques, methods or ways we communicate in English ~~are~~ are going to be left behind and replaced by much more better ones ~~in~~ ~~the~~ very soon. ~~So~~ In some

★ Subtopic ③?  
"Text Messaging Increase"?

countries around the world, a few of those new ~~words~~ written words are starting to being accepted ~~to~~ as normal writing. For instance;

~~the~~ the following example <sup>that</sup> comes from the ~~the~~ essay, "Texting Shorthand Annoys Purists and May Have Lasting Impact" by Seth Mydans,

~~and~~ that says: "... the Scottish Qualification Authority, which sets standards for the testing of students, said phrases like '2B R NT 2B and I LUV U' would be accepted in exam papers ..."

is clearly stating that ~~is~~ this is becoming a fact. I support his point as well because if these "spellings are leaking out into

some broader use" then, eventually, little by little other countries are going to accept it as well, and will cause the renovation of new grammar, spelling ~~and~~ and punctuation standards for writing. Another

cite from Seth's work is the following: "... Education officials in

New Zealand they might accept some abbreviations like WOT or WANNA or UZ on examinations. ..." Here, we can appreciate how <sup>in</sup> some

places, it is ~~go~~ becoming a change for humanity of the way we write. ~~Seth Mydans~~ In fact, this is leading us to a big change on the way we are use to ~~to~~ communicate and hopefully it ~~is~~ doesn't affect us.

Subtopic ②? "New way of writing" <sup>in</sup>

② The way we <sup>are</sup> used to write <sup>in English</sup> is going to look odd and probably difficult a few years later. ~~It is possible~~ Is it possible?

Yes, it is possible. Remember how Shakespeare used to write? Well, a few <sup>more</sup> years later our conventional method of writing in English will probably look the same or maybe harder. One prove of this
