

Aluminum's properties

↑ material of choice

- strong
- light weight
- conducts heat rapidly
- high coefficient of thermal expansion
- protects itself against corrosion
- accepts / holds a variety of finishes
- surface finish

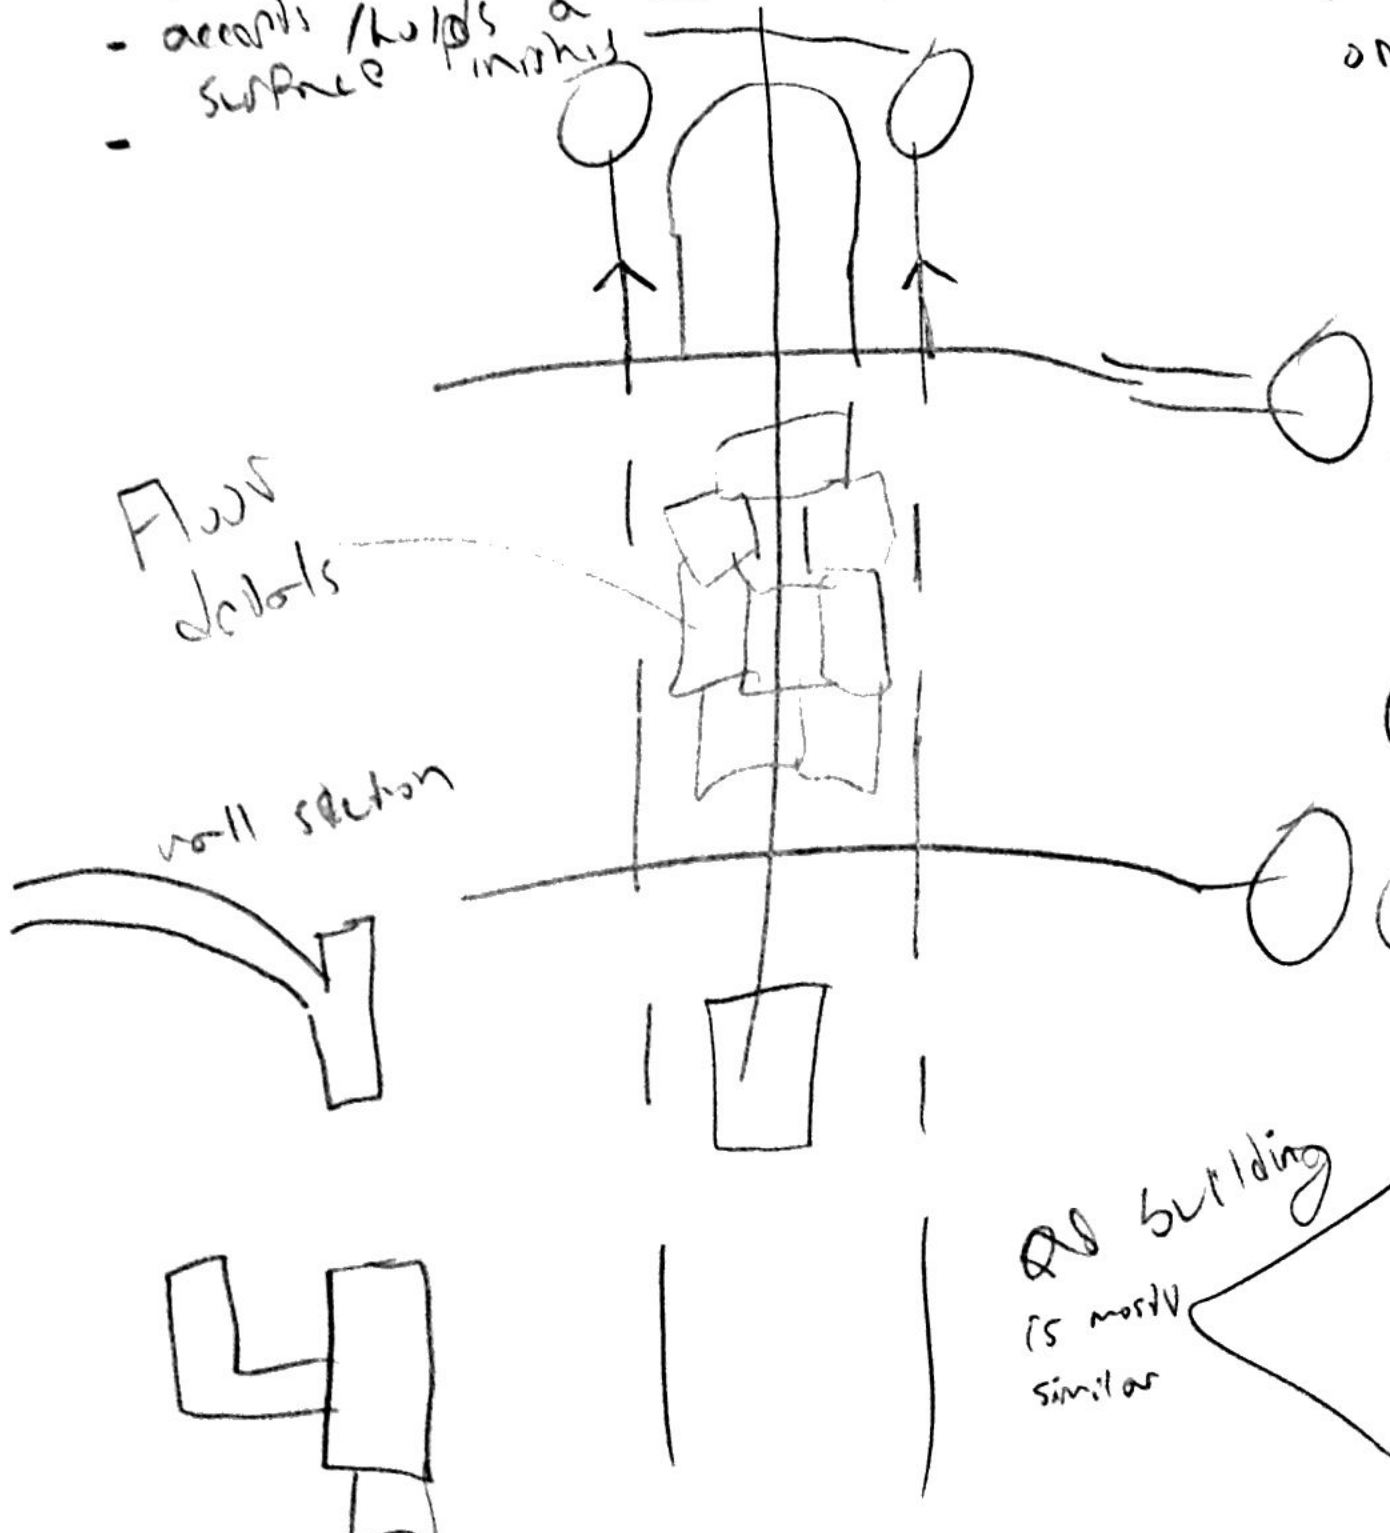

break → address plastic to not conduct temperature

we need on the 4/20/17

- 1) Fix plan etc last project drawings
- 2) move on library structural bay
- 3) finish up plan

Floor details

wall section

this building is mostly similar

do one structural bay / one structural wall system
