

- Sustainability → is a major thing to know about to be able to build structures.

- where the material is coming from
- the amount of energy is being used

- Thermal mass - used as a system for heating & cooling (ex they used it in ~~egypt~~ egypt)

- uses less energy
- solar powered

— o —

the building

- mechanical - has to do HVAC (HVAC)

Ventilation system → connected to the ducted

• Egress
