

1.02 Building in context

S.E.P

Socio-cultural
economic
Political

Buildings do not exist alone in the space it occupies
range of human activities ex. work/home/transportation

Influence on site design
- microclimate
- topography
- natural habitat

human comfort
conserve energy

Both are important

①

Path of sun

②

Path of wind

③

water off site

★ climate change and resource depletion have become more and more important as the years proceeded
