

ARCH 2431 BUILDING TECH III

Field Trip – Site Visit - ASSIGNMENT 07

Site Visit Field Trip

All students must attend the required site visit field trip to complete this assignment. The field trip will include a walking tour in an area with one or more buildings under construction. All students should bring cameras or cell phones for documentation.

Each student is to identify and document two different building assemblies that are identified during the field trip. Document these assemblies through the use of photographs and/or free hand sketches. It is recommended that you ask questions of the tour leader during the field trip to help with this assignment.

The Research

After the field trip use the internet to conduct additional research into the building assemblies you have chosen as the focus of the assignment. Look to identify manufacturers or for additional photos that help to further explain the assembly. Remember to site all your sources.

The Presentation

Create a PowerPoint/PDF presentation including the following:

- *A Title slide to identify the course, semester, section, your name and the professors name.*
- *Title Slide for each of the two assemblies*
- *Documentation – this should include your photographs and/or freehand sketches.*
- *Research on the building assemblies from the internet. Be certain to cite all your sources.*
- *Annotation/Description – include a written description of the assembly*
- *Remember you are doing this twice!!!!*

Grading:

**Grading is based on completeness and your ability to demonstrate an understanding of the assemblies presented.*
