

ARCH 3510 ARCHITECTURAL DESIGN V

Commercial Project

Assignment 2.2: Site Analysis

We will be doing individual site analysis for this project.

These include:

1. Use the base map to label all of the names and types of stores – you can use colors to differentiate between types of stores. (i.e. food, clothing, electronics, banks, drugstore..)
2. Photograph street facades – continuous strip of Fulton Mall from Boerum Place to Redhook Lane – both sides
3. We have a digital model of the buildings
4. Map the traffic patterns, bus and subway lines on the large map
5. Show the sun motion
6. Create a figure ground from the large map
7. Locate major pedestrian movement flows – from subways, connecting neighborhoods, bus stops

This is post 2.2 and is due/posted next class.
