

February 13th: Layout of your Unit (micro)

HOMEWORK: Board 7: Diagrams of Final Site Layout:

Choose your final Site layout

Create diagrams of the first floor showing the common space, elevator/stair cores,

How you will use the exterior spaces (walks, bbq areas, seating, gardening.... Specific to the needs of your family)

Create site sections showing how these elements stack with the living spaces from you micro design.

Where are the views?

How do these spaces receive sun?

Privacy?

Create the paths to walk through your site.

Board 7 will have:

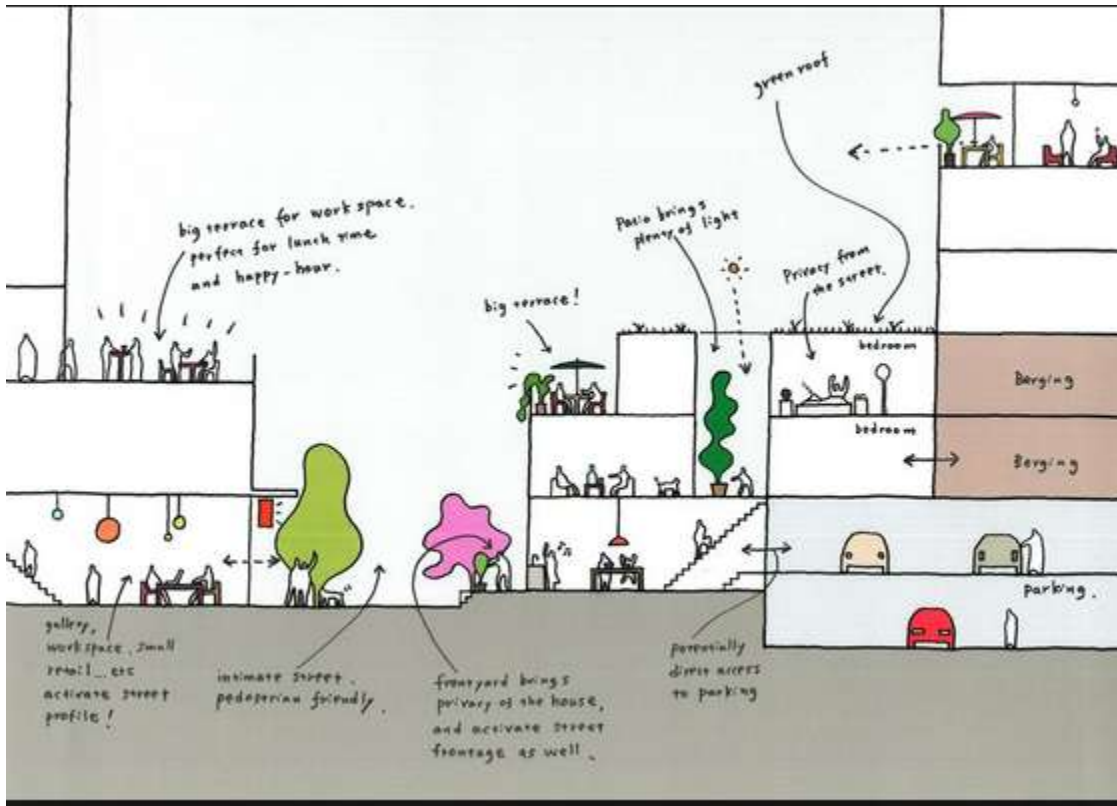

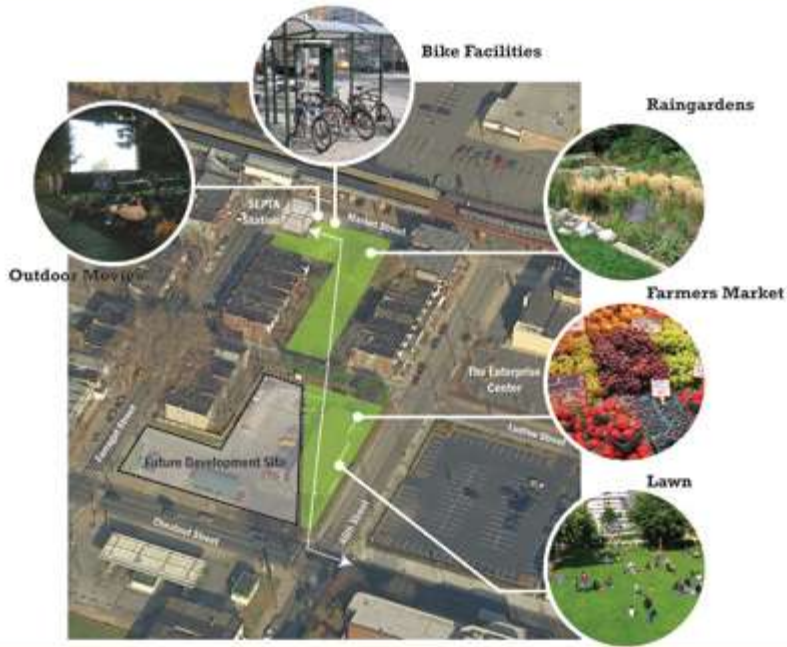

An Overall site plan of the first floor – with interior and exterior spaces labeled

-This site plan of the first floor should show – views, natural light patterns, paths...

Site section showing the diagram of the spaces vertically and horizontally

3D images with the buildings represented as boxes showing how the building sits on the site in the context of the spaces both interior and exterior.

All living spaces must have natural light and fresh air. These spaces are living rooms, dining rooms, and bedrooms. These windows must be a minimum of 30' from the face of another building.

Board 7 is due February 20, 2014.
