Each project must have one ADA single use bathroom. This bathroom will contain one toilet (ADA), one Lavatory (ADA – wall hung), roll in shower and all accessories.

One drawing will be dedicated to your bathroom. It will have:

1. Plan of the bathroom – showing location of all fixtures and tile patterns
2. Elevations of all walls – showing location of all fixtures and tile patterns and heights
3. Images of all the materials you have selected for your bathroom – toilet, lavatory, faucet, paper towel dispenser or hand dryer, soap dispenser, toilet paper, mirror, lighting, tiles (floor and wall)

Bold. Performance.
Innovative design & technology
Powerful
Our toilets deliver a complete, powerful flush every time. Using a specialized dynamic flow profile, our engineers optimize water speed and force for each toilet. That's why many of our toilets can remove up to two pounds of bulk waste in one flush, and our High-Efficiency Toilets (HET) meet the WaterSense℠ standard.
Clean
KOHLER® toilets rinse the bowl surface with every flush. Each toilet we design is engineered to maximize water flow to provide cleanliness and efficiency with every rinse of the bowl.
Plug-Free
Water delivery is precision-designed to make our toilets virtually plug-free.
Guaranteed
Great performance comes down to the ideal combination of power, cleanliness and plug resistance. We measure and fine-

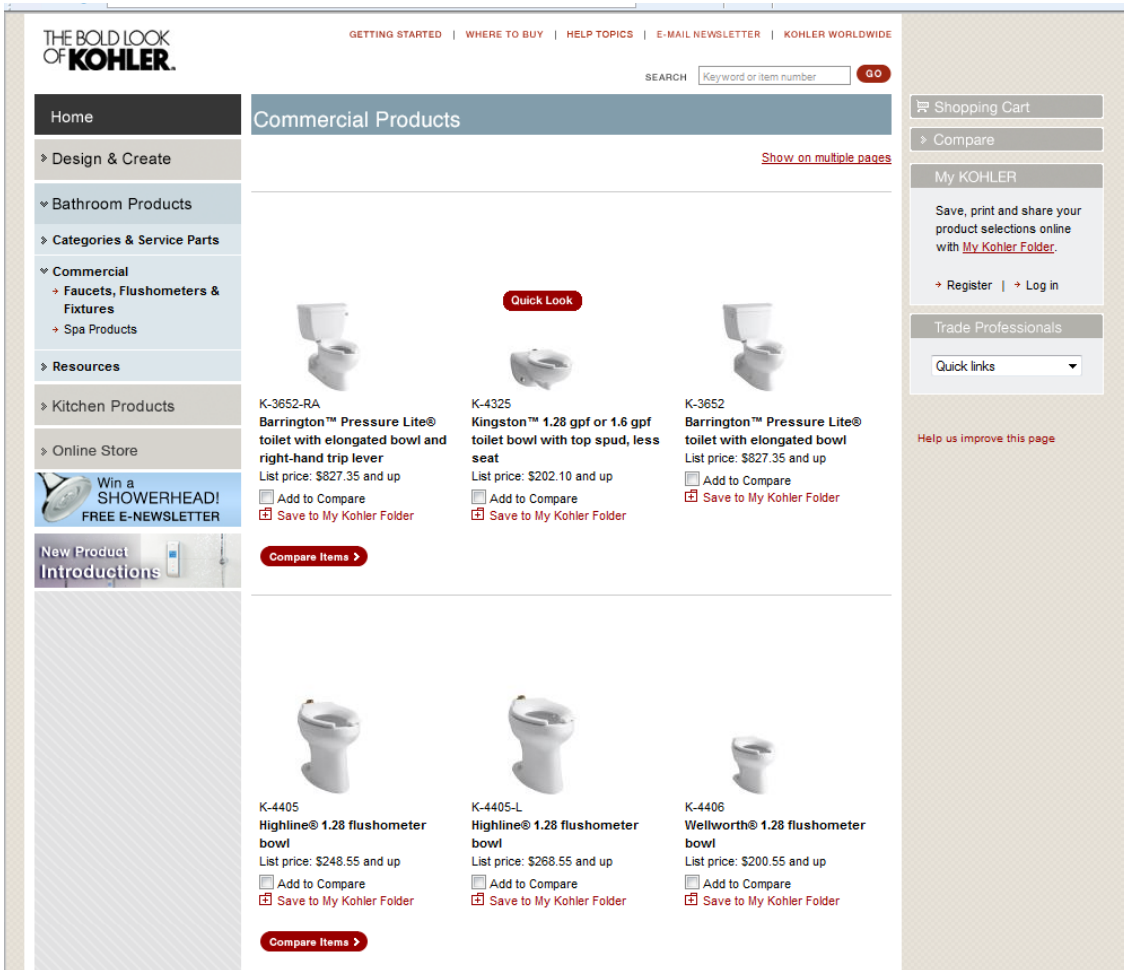
Chose ADA

Or chose Commerical
http://www.us.kohler.com/onlinecatalog/product_result_gen.jsp?category=20&dynamic=y&attribute=section&filterVal=Commercial%20Toilet%20Bowls&sectionVal=Commercial%20Toilet%20Bowls



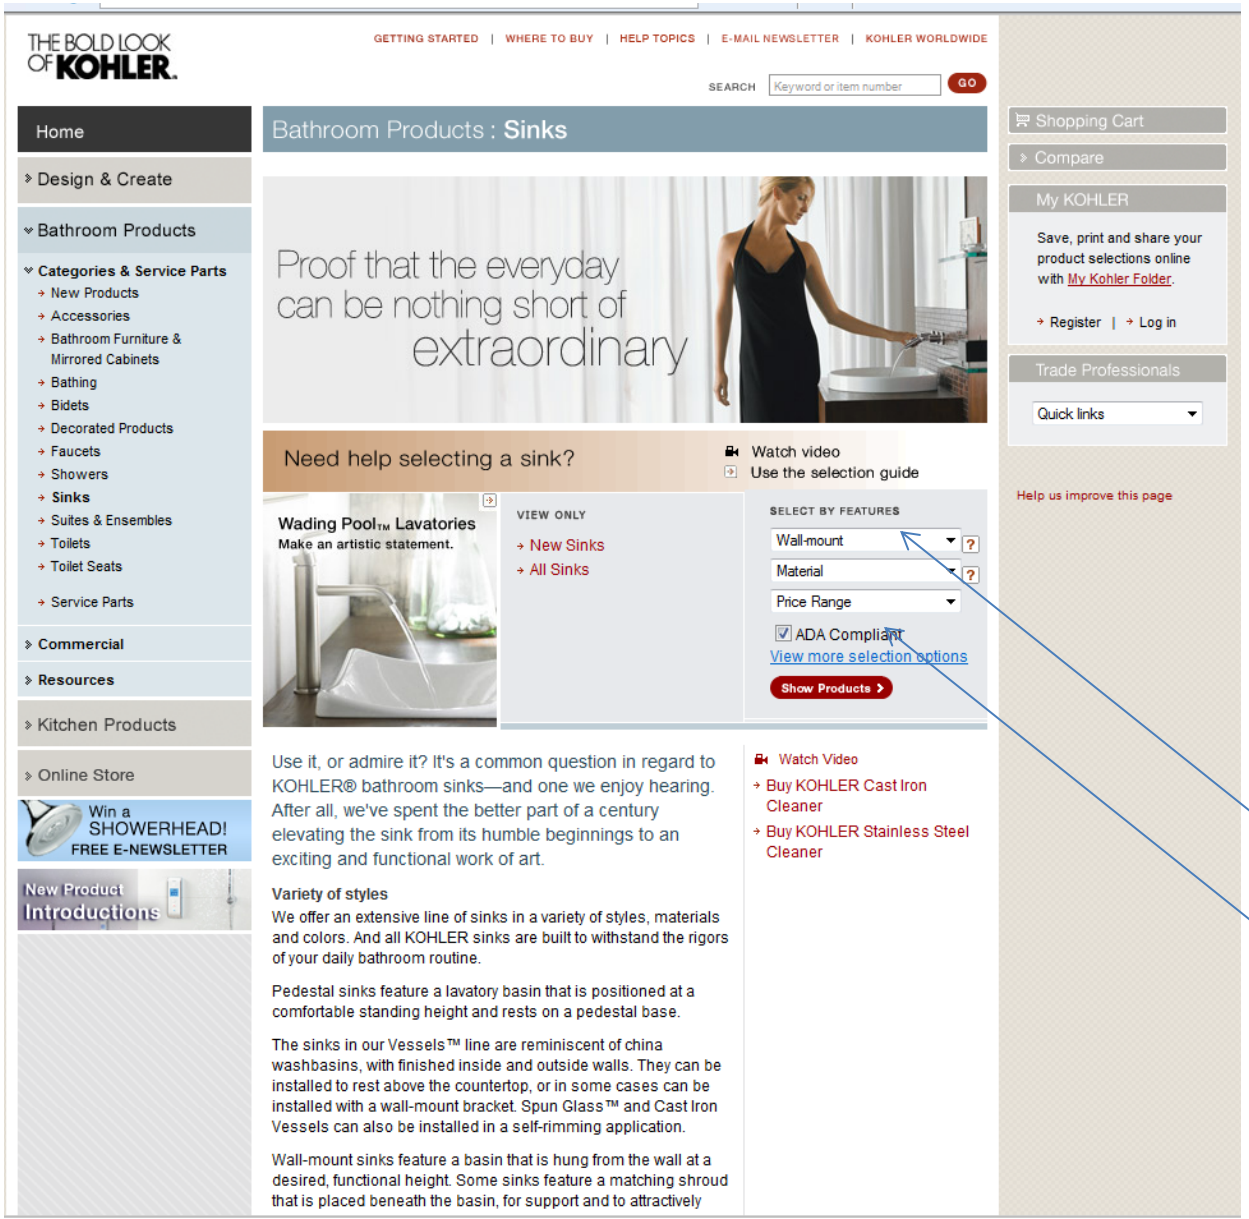
Toilets can be wall-hung (attached to the wall. Floating

Or
They can be sitting on the floor.

Which one is easier to clean?
Which one might make the floor tile pattern easier to see?

Which one would make the room look bigger?

Lavatories:
ADA wall mounted Sinks



Wall-mount

Chose ADA

Lavatories do not come with faucets. You will need to read what type of holes your lavatory has and find a faucet that is ADA that will fit the hole type for the faucet.

Brenham™ wall-mount lavatory with single-hole faucet drilling and soap dispenser hole on the left

Sculpted Touchless AC-powered Deck-mount Faucet
Single hole

Accessories:
Grab bars, mirrors, paper towel dispensers, hand dryers, soap dispensers, toilet paper dispensers….

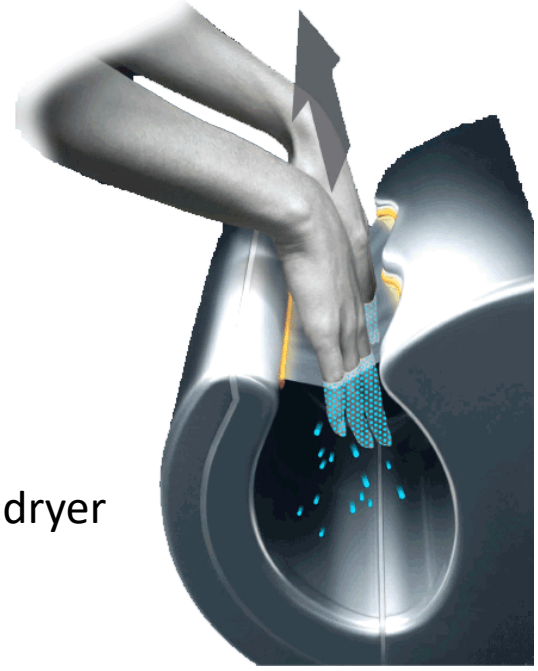
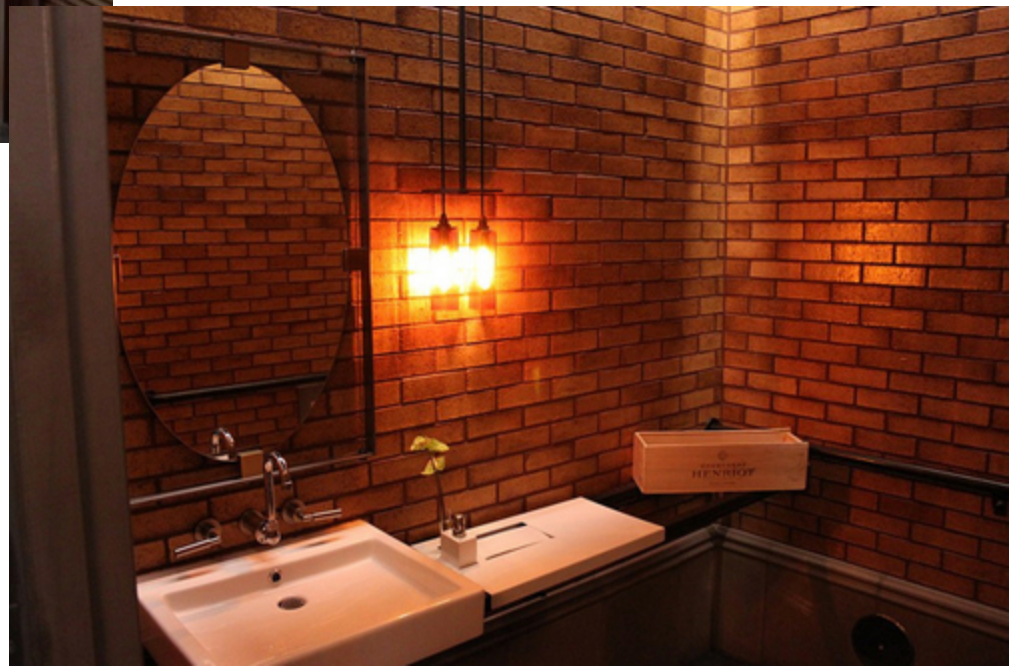
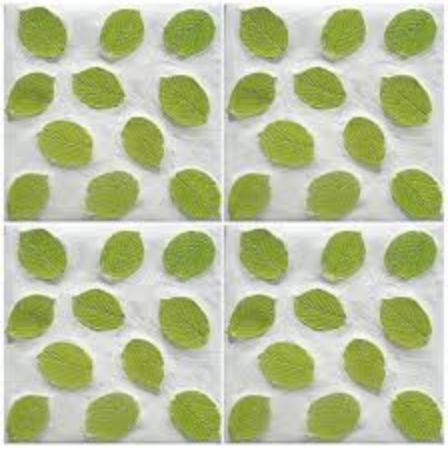
Can also look throughout the internet for newer designs – be careful that they meet ADA



Dyson hand dryer

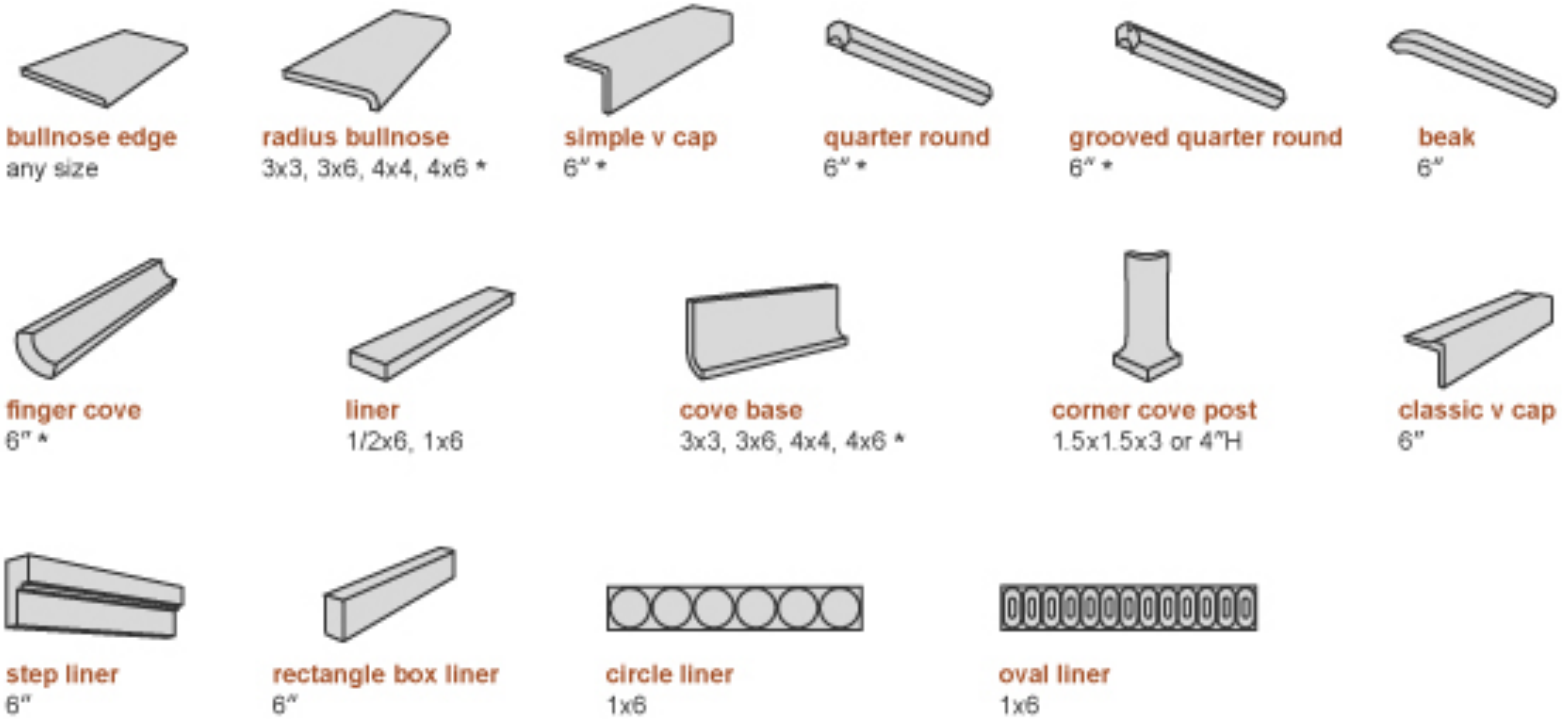


HENRIOT



Floor tiles can be stone, ceramic or porcelain – but must be matte finish to reduce slipping if floor becomes wet. Smaller scale with variation in size also helps reduce the possibility of slipping.

Wall tiles are usually thinner as gravity does act on heavy stone adhered to the wall. Wall tiles should come up above the top of the lavatory (min 36”) and behind the toilet. There are trim pieces to stop the tile partially up the wall.



Have fun with your bathroom.
It should keep you same concept that you are using throughout your building.
Look at colors and patterns.

Integrate lighting into your bathroom.
You should have an overhead light of some kind, and you may also have a wall mounted light over the mirror.
