

ARCH 3612 Design VI Housing Studio

Assignment: Hybrid Model within Site fitting within Zoning Envelope

Hybrid Massing within the Site and Zoning Envelope: *Continuation of conceptual model within the site to scale. Look at a dimension that relates to the depth of your apartments – 35-40' for single loaded corridor or 70-75' for a double loaded corridor. Show this within the site with a red box showing the zoning envelope. This should be done in 3d massing. If you are building models then scale the zoning diagram on the photos.*

Part 1: Continue to develop model showing massing within the site. Show open spaces, paths...and rules how/why buildings are placed. Site Strategy.

Part 2: images of landscapes of parks/ open space that integrates buildings and parks. (show a min of 2 examples -3-4 images of each = total 6-8 images)

HW: Hybrid Massing within Zoning Envelope:

Part1: Hybrid model that fits the proportion and limits of your site documenting the massing within the zoning envelope.

Part 2: 6-8 images of your landscape design research...

This is to be posted by next class.
