

Some professional questions might be as follows:

1. Please describe your understanding of a typical architectural office work flow to create a small building project. (either a design work flow or construction drawings workflow).

2. Where does your expertise or interests fall in supporting the above noted work flow.

3. Please demonstrate this experience in one of your portfolio project. (they should have a portfolio).

4. Have you worked with or do you have knowledge of typical Architects consultants. Please name them and tell us the roles they play in a typical project.

5. What college (or course work) experience do you think gives you the best preparation for a job in an Architects office / Engineers office/ Contractors office?

6. Can you name three significant building projects in New York City from the last 4 years.

7. What impact on the city will each of those projects have? (social/environmental/physical)

8. What do you think is the most important challenge facing a licensed professional working in New York City (engineer/ architect/ contractor).

9, Has your college training prepared you for this challenge?

10. What personal qualities do you have that would enable you to do this job better than the next candidate seated outside waiting for an interview.
