Full Job Description

BUILDING SUSTAINABILITY CONSULTING: Energy Audits, LEED, Passive House, ENERGY STAR, Enterprise Green Communities, Net Zero Energy

The Levy Partnership, Inc., a leading energy and building science consulting firm, is seeking a talented and energetic individual with a background in Engineering, Architecture, Building Science or related field to join our Building Sustainability team. Depending on experience, the successful candidate will serve as **DIRECTOR OF SUSTAINABILITY SERVICES** (five or more years of experience) or **PROJECT MANAGER** (one to five years of experience). Our Sustainability team works on projects that promote energy efficiency, conservation, green building and sustainability, providing consulting services to building owners and developers.

RESPONSIBILITIES

- Manage various multifamily and single family residential energy efficiency and green building certifications (ENERGY STAR, LEED-H, Zero Energy Ready Home, Passive House, Enterprise Green Communities, NYSERDA, NJCEP) for builder and developer clients
- Oversee and/or perform field inspections and testing for energy efficiency and green building certification programs, and other high-performance projects
- Work on developing and evaluating innovations and new technologies for moving buildings to greater levels of energy performance
- Oversee and/or conduct energy modeling, building simulation, system monitoring and evaluation
- Participate with a team of professionals on efficiency programs funded by national, state and private research organizations that promote energy efficiency and sustainability
- Facilitate energy efficiency demonstration and pilot programs sponsored by utilities and state agencies

DESIRED SKILLS AND QUALIFICATIONS

- Bachelor's degree or higher in Engineering (Mechanical, Environmental, Civil or Energy), Architecture, Building Science or related field
- Familiarity with residential and multifamily building construction, especially thermal enclosure and HVAC systems
- Familiarity with building science and diagnostics (i.e., envelope and duct pressurization testing, thermal imaging, etc.), data logging equipment and data analysis
- Software experience, particularly energy modeling (REM/Rate, eQuest, BEopt, Energy Plus, PHPP, WUFI Passive, SketchUp) and MS Office Suite, especially strong MS Excel skills
- Strong attention to detail and ability to effectively manage multiple projects simultaneously

— RESNET RFI/HERS Rater, LEED, PHIUS, PHI, BPI, CEM certifications very desirable

WHAT WE OFFER
