

Technical Designer (Full Time)

Dynamic landscape design firm in Brooklyn with a diverse portfolio a commitment to sustainable practices is seeking a technical draftsman who is passionate, hard-working and highly skilled. Must have a minimum of 5 years of professional experience and drafting.

Responsibilities include:

- Develop CAD-based construction plans from mark-ups and drawings prepared by others
- Prepare shop drawings that would include elevations, sections, and other custom landscape elements such as planters, benches, pergolas, and fences
- Review shop drawings returned by the architect/GC with comments and makes corrections as necessary for resubmittal
- Interface with structural engineer if needed
- Survey and document existing field conditions
- Interface with construction manager and fabrication staff to ensure items are buildable and on budget

Skills Required:

- Dependable, hard-working, passionate, self-directed
- Detailed-oriented with strong organizational skills
- Knowledge of construction and fabrication methods
- Skilled at multitasking and working toward multiple deadlines.
- Proficient in AutoCAD, Adobe Creative Suite, Rhino

Skills Preferred:

- 3-D Modeling

At the forefront of a national design movement focusing on establishing place and identity through ecological design, Future Green's work focuses on innovative strategies of integrating landscape into the built environment. We are a unique company, engaging in both speculative, urban, large scale landscape urbanism projects as well as small scale garden and art interventions.

Please email recruiting@futuregreenstudio.com with your resume and portfolio. No calls please.
