

NEST BUILDERS

INTERNSHIP OPPORTUNITY FALL 2023

Founded in 2004, Nest Builders, is a full service construction management firm dedicated to one purpose: client satisfaction. Combining our engineering and architecture backgrounds with an understanding for hospitality, the success of Nest Builders is based on pride in our work and providing clients with the best experience.

Who should apply?

We are looking to hire a 5th year Architecture student who can initially work part time and transition to a full time position upon graduation.

Design students that are interested in being involved in the construction management side of the project and implementing the design concept and details. The internship will focus on developing design and organizational skills and gaining experience required to start a renovation project, acquire approvals and permitting, pre-construction planning, procurement and scheduling to the start of construction through project completion and sign off.

Minimum GPA of 3.0 out of 4.0

Currently enrolled or recently graduated from an Architecture degree program

Submission of a Digital Portfolio

Working knowledge of AutoCAD / Revit / Rhino

Responsibilities Include:

- As an intern work under the supervision of the firm principal and project manager to gain operational level experience and specific on site construction experience.
- Assist in the development of design build and construction management projects from pre-design phase through construction.
- Prepare procurement schedule for materials and equipment, identifying long lead time items required in order to meet the project schedule.
- Organizing daily and weekly tasks lists for the project and coordinating with the project manager to ensure tasks are being completed.
- Reviewing and coordination of the design drawings, scope of work and construction documents with the construction team and project manager.
