

PROJECT TWO : SENIOR PROJECT RESEARCH PAPER

Research a topic that *interests you* for your senior project. Explore ideas and discover new opportunities or reimagine existing ones. Using the same methods as the project one, you will use what you're learning to research and prepare a paper sharing your findings as a possible Senior Project. When completed, you will be able to back up and defend why your topic is important to your Senior Project Advisor. Remember that its acceptance is dependent upon your advisor/professor for that class.

Your project will consist of:

- An abstract of concept.
- Research to validate ideas, assumptions, and specific perspectives:
 - Why the topic is important to you?
 - How does your concept/project differ from existing impact projects?
 - What are the best approaches toward getting your message out to the intended audience(s)?
 - What is a realistic timeline to achieve the desired result by the end of the 13 weeks?

The topic you select for your paper is **completely up to you** *but can't be related to your project one*. So, pick a topic you find interesting and will have fun creating.

If you are having problems with the project at any point, DO NOT WAIT until the final weeks for help. Reach out to me so we can work out a plan.

FIRST DRAFT DUE : Week 10 • April 13

FINAL PAPER DUE : Week 14 • May 11
