Revit Introduction

Scavenger Hunt

RAC_Basic_Sample_Project.rvt

To describe the sample model identify and create as many unique views as you can find. (the scavenger hunt)

Group related views and place them on a sheet at the appropriate scale. A unique view is one that adds to the story and is not redundant.

Student Learning Objectives:

Upon successful completion of this assignment, the student will:

- Correctly Name a Revit File according to class standards
- "Tell a Story" through drawings by selecting appropriate views of a Revit Model.
- Logically group together related views and format these on a sheet in Revit.
- Understand the appropriate scale for various drawing types.

Assessment:

To evaluate the student's achievement of the learning objectives, the professor will do the following:

- Evaluate the file for proper naming convention.
- Evaluate the number of stories told by the student.
- Evaluate the quality and completeness of the story told by the student.
- Evaluate the quality and formatting of view laid out on sheets in Revit.
- Evaluate the appropriate use of scale.
- Assess assignment for deadline submission / lateness
- Commend the student for initiative beyond the given the assignment.
