

Doing a KWL+

What's your issue/problem/topic?

- 1. K-KNOW:** Set your timer for 5 minutes. Then just start writing down everything you already know. Don't stop!
- 2. W-WANT:** Another 5 minutes. This time generate all the questions you can about what you want to know about the topic: who, what, when, where, why, how
- 3. Do 10-15 minutes of initial research** using whatever tool you want. Bookmark, copy URL...
- 4. L-LEARNED:** And yet another 5 minutes to write down what you learned in your 10-15 minutes.
- 5. + STILL WANT TO KNOW:** This is most important part! It will give you some direction about where to go next.
