

THE FIX:

Introductory Paragraphs

Original Paragraph:

Red = the topic sentence

Orange= the integration with the source

Purple = the thesis statement

There are many different aspects of emotional intelligence that people view as most important to attending college for the very first time. Many college freshmen are new to the campus life and have a hard time adjusting to the new set of rules and simple fact that college is not like high school. In the article, “Why College Freshmen Need to Take Emotions 101,” Divecha and Stern argues that students aren’t equipped with the ability to balance emotions enough in order to follow through with their academic career. I argue that mindset and willingness to make changes and smart decisions that will only help you to succeed in your academic career. These are two key factors to a student making the transition into the first year of their college years.

There are many different aspects of emotional intelligence that people view as important to develop for students attending college for the very first time. Many college freshmen are new to campus life and have a hard time adjusting to the new set of rules and the simple fact that college is not like high school.
