Professor Trofimova

From today what we saw during the class time in ZOOM, the Ted Talk by Stefan Sagmeister. I found out a lot important things about design. Stefan Sagmeister said in the ted talk that the ads on the street will affect his mood if it was bad he will feel sadness. he very likes the billboard which made him feel happy every time he walks there and hopes to have work and can see it every day. He found that on his list about half of the things on the list relate to the design.

Modernism from Oxford is defined as a modern character or quality of thought, expression, or technique. It is both a philosophical movement and an art movement that, along with cultural trends and changes, arose from wide-scale and far-reaching transformations in Western society during the late 19th and early 20th centuries. They thought away from the old thinking and to follow the new styles which are keeping change and change. so modernism is like the cultural movement in that period.

Postmodernism is from a late 20th-century style and concept in the arts, base focused on the architecture, philosophy, the arts, and criticism that represents a departure from modernism. It also could be define of irony. It has a heart general distrust of grand theories and ideologies and a problematical relationship with any notion of “art.”

Analog art is any art where the material making the art is manipulated by hand, like paint. You can control any portion of it. Like photography, Painting, sculpture, and printmaking from ink, they are all considered analog. These arts are simple and easy to make by hand and some simple materials.

On the other hand, Digital art is an artistic work or practice that uses digital or online technology as part of the creative or presentation process. Online art and digital photography are all considered as digital art forms. From the 20th century it has been made to today various names have been used to describe this process, including computer art and multimedia art. these arts cannot be further broken down because they are digital and can be saved and copy in many many times.
