

## Homework

1.

$$\frac{4,500}{90,000} = \underline{0.05\%}$$

2.

$$369,000 - 79,704 = 289,296 - 100\% \\ 79,704 - \underline{27.55\%}$$

3.

$$1,150,000 - 245,000 = \underline{\$905,000}$$

4.

$$\begin{array}{r} 876,500 \\ + \quad 10 \\ \hline \end{array} \rightarrow \underline{\$87,650}$$

$$876,500 - 87,650 = \underline{\$788,850}$$

5.

298,000

+ 15%

44,700

a) \\$44,700

b) \\$253,300

$$298,000 - 44,700 = 253,300$$

6.  $46,780 + 2,342 = \underline{\$49,122}$

7.  $2,500,000 - 11,360 = \underline{\$2,488,640}$

8.

$$\begin{array}{r} 36,000 \\ * \quad 10 \\ \hline \end{array} \rightarrow 3,600$$

$36,000 + 3,600 = \underline{\$39,600}$
