Project: Sea Ranch Condominium

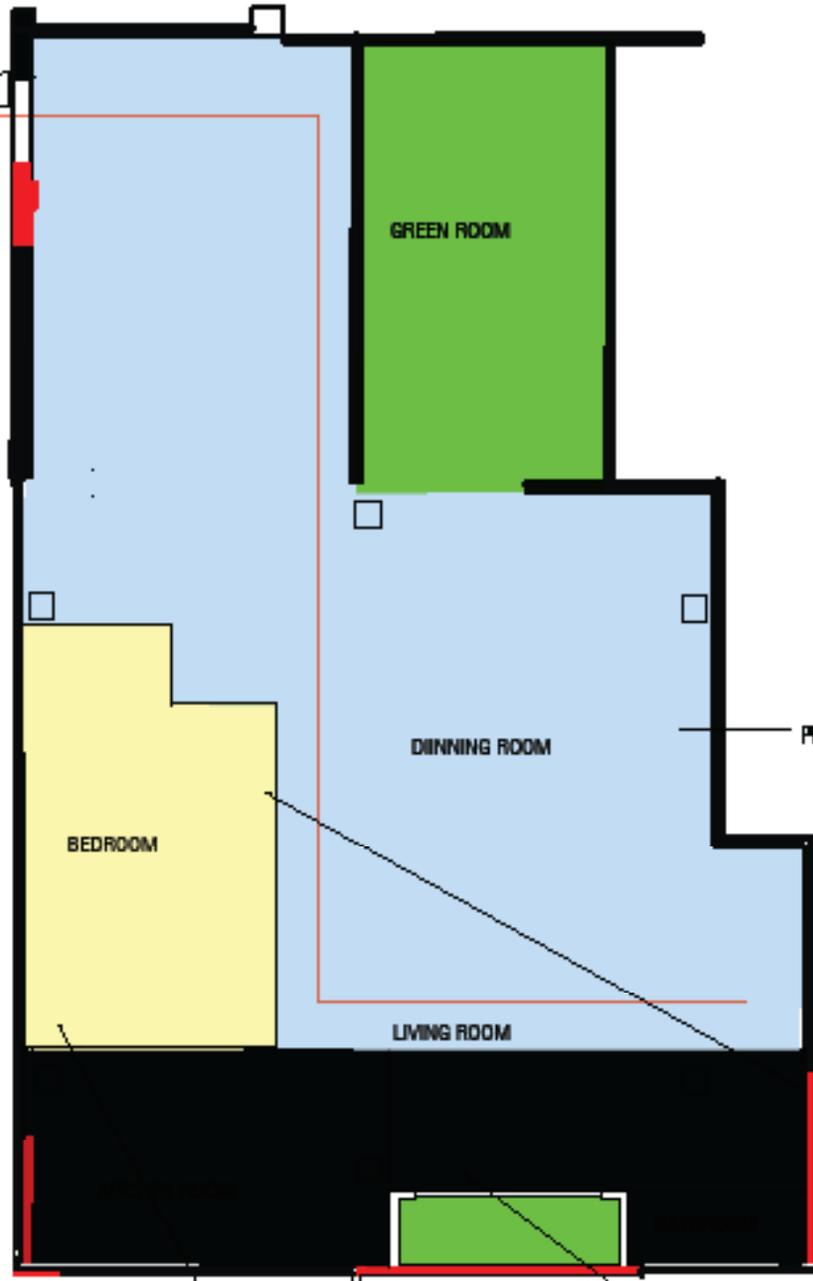

Charles Moore,
Sea Ranch Condominium,
Built 1966
Sea Ranch, California

The Sea Ranch Condominium is in the Pacific coast of Sonoma County, California. It has a good view over the Pacific Ocean.

This was a 10-unit structure project, it was one of his first major work. The design was inspired by barns and other farm buildings in the area

This design of his project was a 10-unit project overlooking the Pacific Ocean, and blending into the mountains at the same time. From a distance you wouldn't be able to see the house unless you were close enough
