

Tower House Project

This house was designed as a stairway to the top of the trees. The Glass-enclosed stairs, highlights the transition from the ground to the treetop. The footprint was kept to the minimum space possible in order to not disturb the woodsite. This was in order to make an engagement from the tower house and the surroundings. The dark-green back painted glass from the house camouflages the house and reflects the woods.

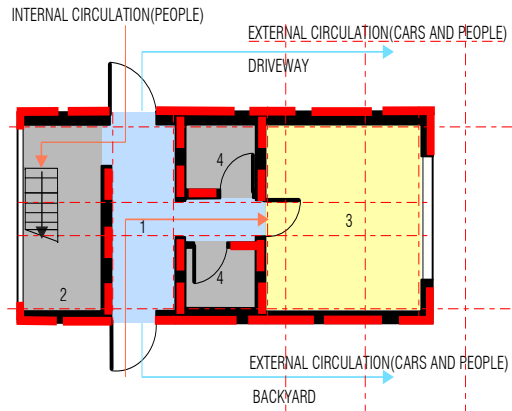

Peter Gluck received his bachelor of arts in 1962 from Yale University. He also has a master in Architecture from The Yale School of Architecture. Peter was influenced by Louis Khan who was an iconic architect, design critic and architecture professor. Gluck was one of the members who started "the design build culture"; a method to deliver a project in which the design and construction services are contracted by the design builder.

Architect: Peter Gluck
House Project: Tower House
Year Constructed: 2012
Location: Upstate New York
Square Footage: 2545.0 Ft²
