Symbolism means to me that everything I see throughout my life and day and also how I represent myself through a bigger picture and it represents power. Also I use symbolism in my martial arts training as well. It gives me perspective in school. Symbolism also helps in personal life as well.

In my school work life the way I use symbolism is to make logos and designs and learn the mechanics of each adobe program to make the assignment successful. college importance is personality self discipline and willpower to get to classes on time. It symbolizes I am dedicated student willing to show interest to benefit me in the future. With this help it gives me chance to produce good content.

During my personal life symbolism is used to help me do get directions such as going to the workout gym to my house. I also color and make illustrations this helps with symbolism to me because i can make it anything

I want with my own meaning. In addition me walking a lot of places is a way of symbolism because it marks the symbol of myself as young boy adventuring out in the world that I am living.

In my martial arts training I use symbolism to signify each rank that I have achieved over the years. With each new rank level it symbolizes I am ready to begin to learn new techniques and gain a lot of new skills to further my training. I also symbolize the fact that I am constantly learning and getting better techniques everyday.

In an overall sense I have these skills for life and I carry to everything that I do. Symbols don't necessarily have to be written what I can bring to the table or the plate matters more than what my opinions and thoughts are. Being open minded keeps me well rounded it helps me grow. Overall I keep seeing symbols in the most positive picture out there.
