

## Ancora is looking for Summer Interns

Ancora Engineering, PLLC was established in 2018 and has grown to be a leading engineering firm servicing the greater New York City Construction Industry. We specialize in the sectors of Demolition, Partial Demolition and Alterations, Geotechnical Investigations and Geo-Structural works, Excavations and Foundations, New Building Structural Design, Structural Stability assessments and Remediations, Legal and Expert Witness and Property Technical Representation, Quality Control and Special Inspections, and more! The company was founded by James Patterson and Stephen Lampard. Gregory Moormann was onboarded as Director shortly after the company was founded. With over 50 years of combined experience between our leadership, Ancora is prepared to provide the most suitable solutions for any project.

The job responsibility is to be Ancora's onsite representative, conduct job reports and updates, and assist on designs. Ancora works in three different branches of civil engineering: structural, geotechnical and demolition. You will have the ability to touch all three phases if interested.

### Qualifications:

- Prior internship experience (preferred)
- On-site experience
- GPA 3.0+
- Able to commute to New York City
- Able to display prior design work
- Proficient in report writing
- Basic understanding of Microsoft office (Word, Excel, Outlook, etc.)
- Basic understanding of building/construction components
- Can communicate effectively with a team
- Willingness to learn

If you think you're a good fit, send your resume and a list of relevant courses you've taken to [mroland@ancoraengineering.com](mailto:mroland@ancoraengineering.com) & [ssingh@ancoraengineering.com](mailto:ssingh@ancoraengineering.com) .

*We Look forward to hearing from you!*
