Job Description

Mission Statement

- Consolidated Edison Company of New York, Inc. (Con Edison), Orange & Rockland Utilities (O&R), and Consolidated Edison Transmission (CET) employees are required to follow health, safety, and environmental policies, EEO, Standards of Business Conduct, and all other applicable company policy and procedures. We all share a responsibility to advance the company's mission by excelling at our three corporate priorities – safety of our people and the public, operational excellence in all that we do, and ensuring the best possible customer experience.

Core Responsibilities

- Manhattan Electric Construction seeks to recruit talented individuals for its Underground Sections. Candidates will ensure the safe, timely and effective installation, maintenance, repair and inspection of underground conductors, devices and associated electrical distribution equipment in accordance with operating procedures and engineering plans and specifications.
- Ensures that direct reports work in a safe and efficient manner and in accordance with established policies and procedures.

- Certifies, accounts for and approves expenditures for labor, material supplies and equipment within prescribed limits.
- Assigns, coordinates and manages personnel to achieve maximum efficiency. Monitors and supports crew activities and ensure that all required reporting and documentation are completed correctly and in a timely fashion.
- Supervise and direct field employees in their daily work activities, which includes the installation, maintenance, repair and inspection of Con Edison's electric distribution system.
- Must have the ability to evaluate, prioritize and rapidly respond to changing conditions on the electric distribution system.

Required Education/Experience

- Bachelor's Degree and with two (2) years of relevant work experience or
- Associate's Degree and with four (4) years of relevant work experience or
- High School Diploma/GED with five (5) years of relevant work experience

Relevant Work Experience

- Ability to effectively interact with customers and provide exemplary customer service. Required
- Strong oral and written communication skills. Required
- Flexible to handle multiple assignments and meet deadlines. Required
- Render sound business decisions using analytical and technical skills. Required
- Demonstrate leadership skills to implement and champion change to enhance productivity, promote diversity and inclusion, and create a zero harm safety culture. Required
- Proficient in Computer operations similar to windows, Microsoft Office, Oracle and WRM applications. Required

- Must be able to supervise employees and manage their productivity in the above listed functions, and possess good interpersonal skills. Required
- Performing work on and/or providing oversight for personnel responsible for maintenance, repair and replacement of equipment similar to electrical conductors, meters, transformers and associated equipment. This includes fundamental knowledge in the safe operation, design and repair of electric distribution equipment of varying voltage classifications and configurations. Required
- Detail Oriented. Preferred
- Familiar with Corporate safety and environmental procedures and policies on employee relations. Preferred

Licenses & Certifications

- Driver's License Required
