Job Description

Mission Statement

- Consolidated Edison Company of New York, Inc. (Con Edison), Orange & Rockland Utilities (O&R), and Consolidated Edison Transmission (CET) employees are required to follow health, safety, and environmental policies, EEO, Standards of Business Conduct, and all other applicable company policy and procedures. We all share a responsibility to advance the company's mission by excelling at our three corporate priorities – safety of our people and the public, operational excellence in all that we do, and ensuring the best possible customer experience.

Core Responsibilities

- The Senior Specialist is responsible for providing Environmental, Health & Safety (EH&S) support so that work activities, including construction, operation, maintenance and retirement of our energy systems, are conducted safely and in a manner that complies with all federal, state and local regulations in addition to Company procedures and protocols. Work closely with operations personnel to support the Company's commitment to Environmental, Health and Safety Excellence by achieving a zero harm and 100% compliance culture.

PUBLIC

- Ensures implementation of Company safety, health and environmental programs for our employees.
- Adhere to the Company's EH&S programs and provides support so that safe practices are followed and the environment is fully protected in accordance with Company policy and governmental regulations.
- Engage and support a culture of teamwork, honesty, integrity and openness regarding environmental, health and safety issues.
- Interaction with Operating Groups.
- Perform EH&S incident analysis; complete entries into the Safety and Health Information Management System (SHIMS) and fulfill reporting requirements (as required).
- Work collaboratively to continuously improve our safety culture and compliance with Environment and Health standards.
- Conduct and document onsite Job Site Safety Exchanges, inspections and assessments of company and contractor personnel regarding work practices.
- Work with operating areas to provide EH&S input in developing, critiquing, and revising operating area procedures and work practices.
- Provide EH&S assistance in investigations and Close Call and/or Time out resolution.
- Provide advice, counsel and information on EH&S matters to all levels.
- Assist in the development and coordination of EH&S-related programs.
- Assist with spill reporting and EH&S response, including emergency off-hour response and evaluation.
- Establish a Zero Harm Culture amongst the team that is focused on employee and public safety, including but not limited to: developing and implementation of safety programs.

PUBLIC

- Communicate EH&S-related information at business and safety meetings, in the field and through safety talks and tailboard sessions.
- Conduct periodic self-assessments to predict and prevent noncompliance.
- Implement plans, programs and strategies that effectively protect our workers and the public from the potential hazards associated with our work activities and negative impact to the environment.
- Work to integrate and promote human performance initiatives into our work practices to achieve operating excellence and prevent incidents that may result in injury, environmental issues, vehicle collisions, and equipment damage or other impact.
- Coordinate the company's response to environmental incidents such as spills and releases so that reporting, cleanup, response operations and waste management are conducted safely and in compliance with all regulatory and company requirements.
- Monitor and track internal and external spill reporting and spill close-out requirements.
- Provide EH&S support as required for the maintenance, repair and improvement of our energy delivery systems and ensure implementation, update and modification to Hazard Assessments and Job Safety Analysis.
- Provide assistance as required in the management of environmental compliance programs and plans such as SARA and chemical reporting.
- Perform contractor oversight activities to measure compliance and EH&S performance in accordance with applicable procedures and the Contract Administration Manual. These oversight activities will also include pre-work review of environmental, health, and safety plans (eHASP) for acceptance.

PUBLIC

- Perform FDNY site permit inspections as necessary.
- Perform other related assignments as required, including response to emergencies 24 hours/ 7 days a week.
- Perform other related tasks and assignments as required.
- Work with operations to review and enhance safe work practices.

Required Education/Experience

- Bachelor's Degree and Three (3) years relevant work experience or
- Associate's Degree and Four (4) years relevant work experience or
- High School Diploma/GED and 5 years relevant work experience

Relevant Work Experience

- Candidates must be capable of demonstrating their EH&S experience, either as a EH&S professional or as a noted safety leader. Required
