Job Description

Mission Statement

- Consolidated Edison Company of New York, Inc. (Con Edison), Orange & Rockland Utilities (O&R), and Consolidated Edison Transmission (CET) employees are required to follow health, safety, and environmental policies, EEO, Standards of Business Conduct, and all other applicable company policy and procedures. We all share a responsibility to advance the company's mission by excelling at our three corporate priorities – safety of our people and the public, operational excellence in all that we do, and ensuring the best possible customer experience.

Core Responsibilities

- Must be able to perform operational functions; including the operation of boilers, turbines, generators and all auxiliary equipment in a steam generating station.
- Must have the ability to perform mechanical maintenance tasks and considerable manual labor.
- Qualify in various operating posts including, but not limited to: Rover/field operator, Control Room operator, and perform electrical high tension switching.
- Perform functions required for steam production, operate equipment associated with steam generating boilers such as

PUBLIC

boiler feed pumps and fans, turbine-generators and related auxiliary equipment, water treatment systems, and fuel delivery systems.

- Must troubleshoot equipment in the field that fails to start/stop.
- Perform mechanical maintenance tasks.
- Knowledge of boiler water chemistry and steam cycles.

Required Education/Experience

- High School Diploma/GED and 4 years relevant power plant, merchant Marine, United States Navy, or other related maintenance experience.

Preferred Education/Experience

- Bachelor's Degree Engineering

Relevant Work Experience

- Relevant Power Plant, Merchant Marine, United States Navy, or other related mechanical experience. Required

Licenses & Certifications

- Driver's License Required
