

Above: Same color, varying transparencies layered one on top of the other.

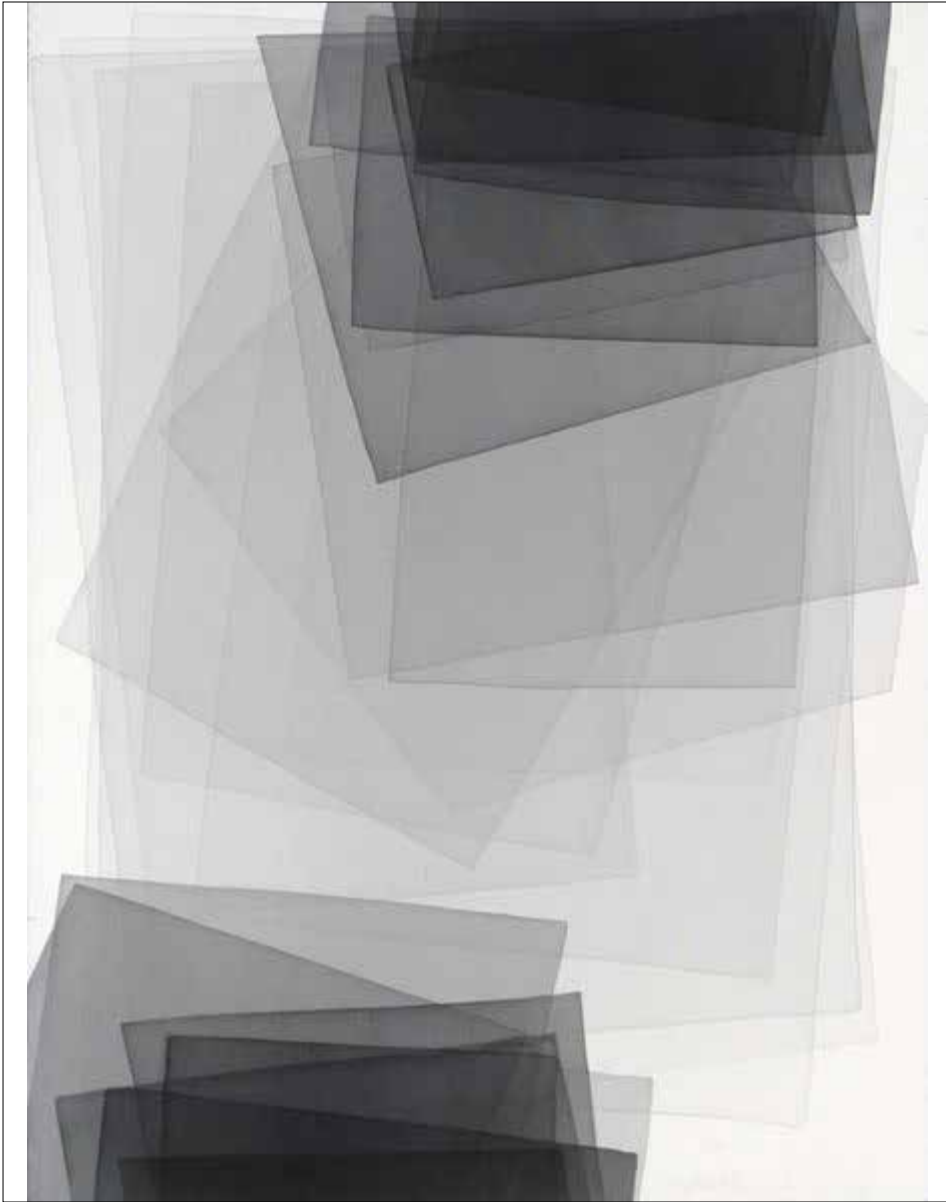

Above right: Transparencies of different colors, however put on a black background.

Right: various executed samples

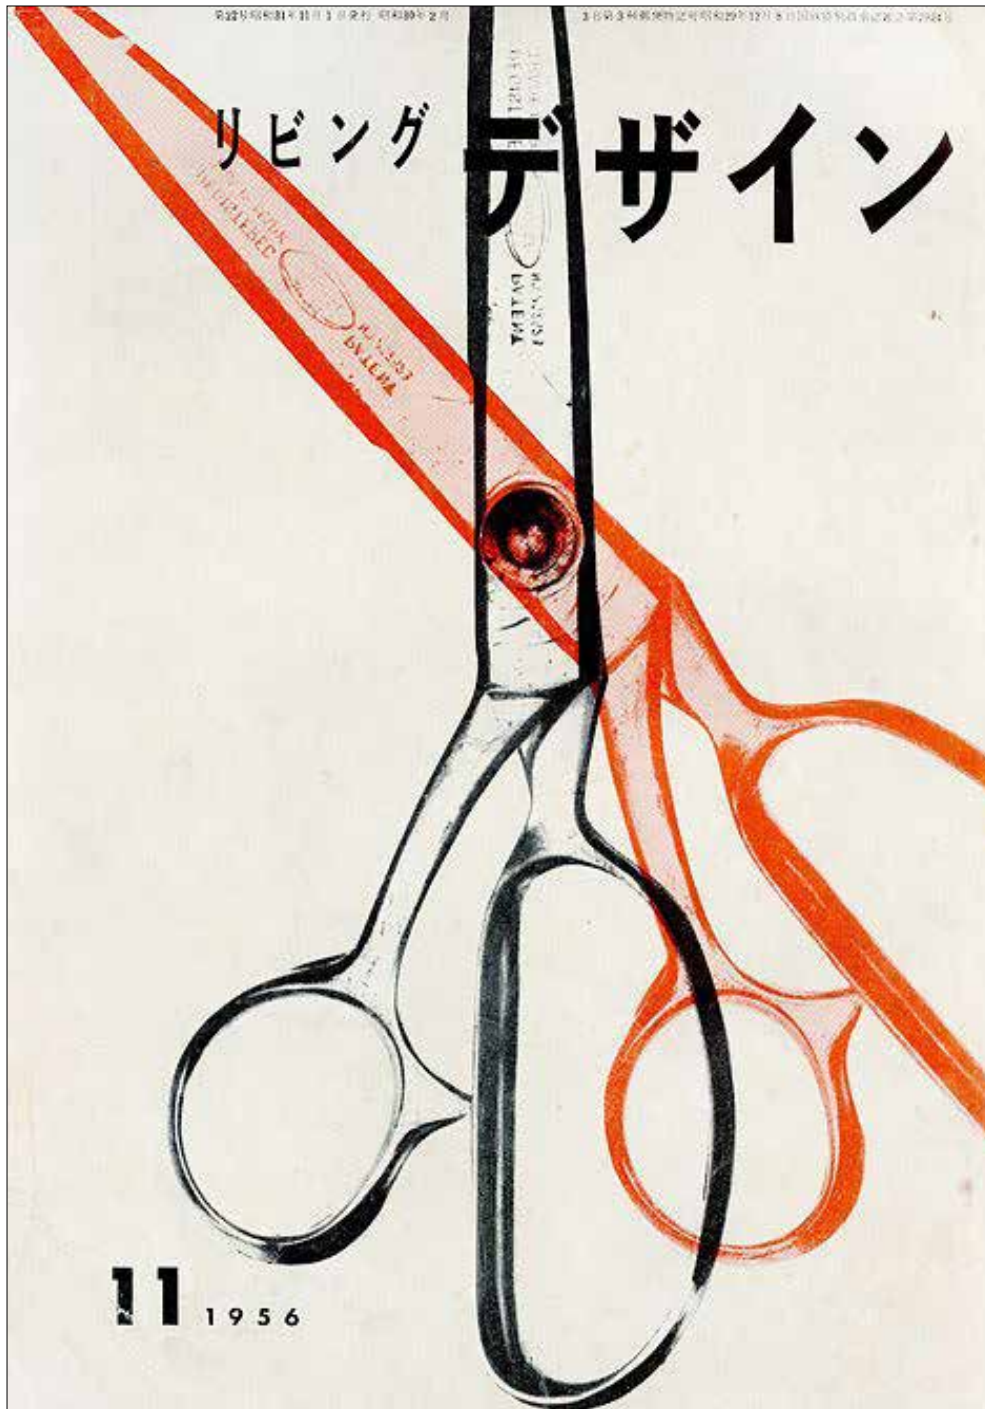

Above: Transparency used over a black-and-white image  
 Top: Transparencies of different colors, on different background images  
 Left: vaTransparent color text on solid black

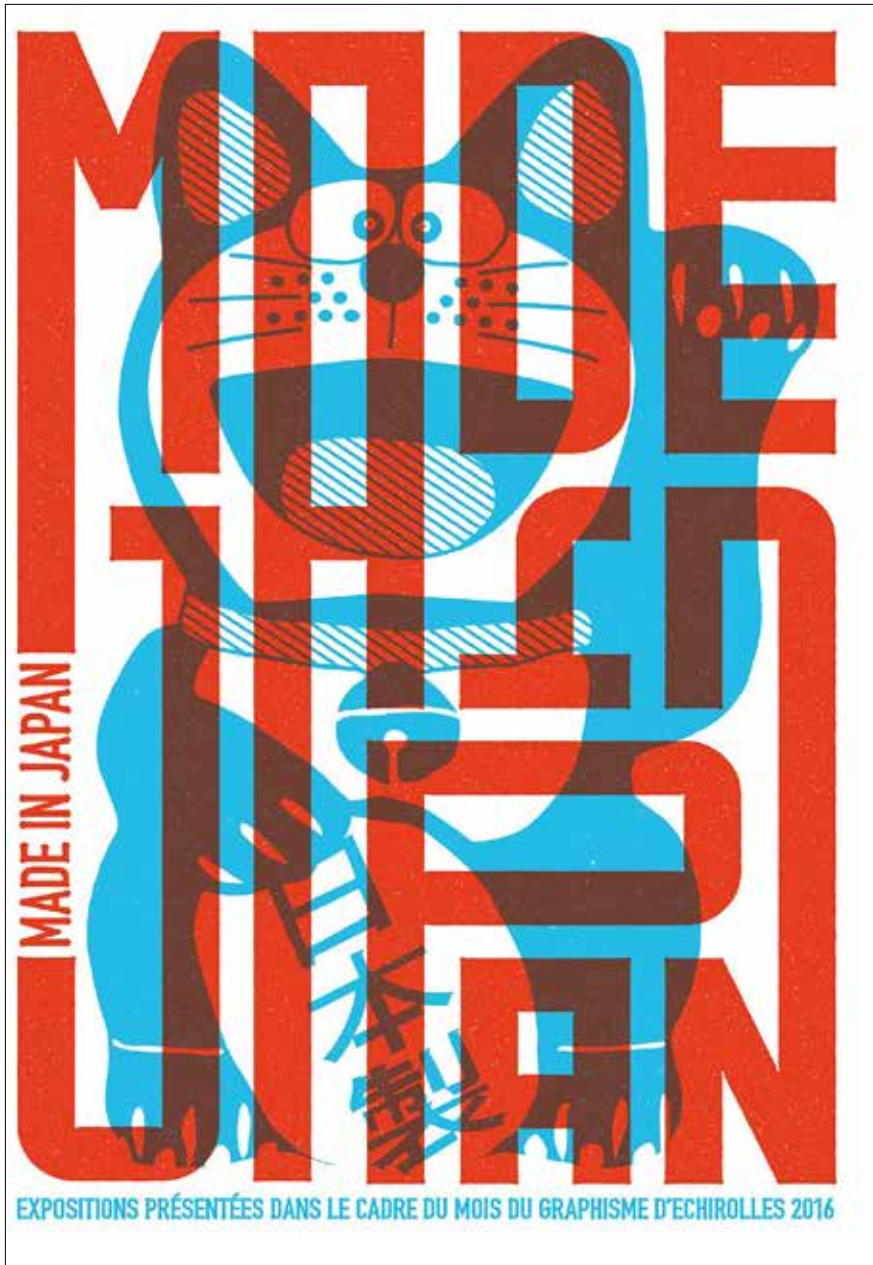

**Above and right: Two different artists, Above, a designer using various transparencies of black, layered. Right, water colored sheets, layered and then photographed, all are the same transparency.**

Above: two colors, varying transparencies; note the shape works better with the map of Texas than the star over the word "IN".

Left: A photograph of an object, reduced in Photoshop, changed with tints.

Only two colors used.
