

Capture Moments

With

Fujifilm Instax Mini 8 Camera

A Little Information

The Fujifilm Instax Mini 8 Camera is an inexpensive travel friendly camera. It allows you to take photographs and instantly prints out the film. Instax cameras have been popular because of the unique and classic effect of the pictures. The camera includes all chemicals needed to develop a film once you take a picture. All you need are films.

Front

Back

Brightness Adjustment Dial:

Instax Mini 8 Camera has 5 different brightness adjustments. The camera will automatically determine the best brightness suitable for taking a picture. It'll inform you by lighting the corresponding orange light. Turn the brightness adjustment dial to the position of the light. There is High-key mode which doesn't have a light indicator. High-key mode allows you to take softer pictures.

- Indoors, Night F12.7
- Cloudy, Shade F16
- Sunny, Slightly Cloudy F22
- Sunny and Bright F32
- Hi-key** High-key mode allows you to take softer pictures
