## Join City Tech and its Internship Program!

Here at City Tech, our internship program offers employers a strong, diverse and talented set of individuals who are willing to work hard to build a better tomorrow.

With our internship program, you'll provide students with valuable experience that is needed for them to grow their existing passion for advertising design, and, you'll have interns who's mindset is always design-first. Our students are ready to assist in all areas of the work given.

With their various skill sets in graphic and advertising design our students have obtained training in graphic software such as Photoshop, Indesign, and Illustrator, making them highly desirable interns. Students are also exposed to film with Final Cut, and photography with our studios.

As part of our program, the selection of students available are those who have proven themselves academically with the best grades in their classes as well as those who have shown commitment to their work.

Students are available to work 100 hours or perhaps more during the internship period, providing you with flexible schedule and a dedicated worker. We'll provide a substantial workforce that will give real benefit whether it's individually, working hands on or working together in a team-focused environment.

Our interns are looking to create the best possible solutions for any work assignments that are given to them. For each intern you select from City Tech a mentor is encouraged allowing employers to provide feedback for the student. This is very important to us which is why we ask that you give a weekly evaluation of the intern. With this information, we'll collaborate to constantly improve our efforts, the efforts of our students, and our program offerings.

Among this, we're planning a new onsite assessment program for workplaces considering mentoring City Tech interns, where Dr. Doh or a member of her staff will come to the workplace and help potential employers assess their own needs and how the internship program can help them as well.

Choose a City Tech intern, and you'll be looking at the newest leaders this world's got to offer.

Sincerely,

*Pla Y. Doh*
