

My personal logo just stands for my playstation Username. It doesn't really have any meaning behind it. I just combined two words while making it a long time ago. WP stands for WastedProdigy. I decided to use this because gaming is a big part of my life. Ever since I was born I didn't play with toys or anything like that I went straight to gaming. It just brings a sense of relief. My logo just stands for my love for gaming.
