

Assisting Light Designer for "The Crazy Adventures of Don Quixote/ Las Locaventuras de Don Quijote"

Daniella Cuttone

Introduction

I was offered to assist lighting Designer
Miguel Valderrama for the design of the
Musical "The Crazy Adventures of Don
Quixote/ Las Locaventuras de Don Quijote"
which will be a bilingual play for kid's at
Teatro SEA (Society of Educational Arts),
which premiers the third week of March 2023

Materials and Methods

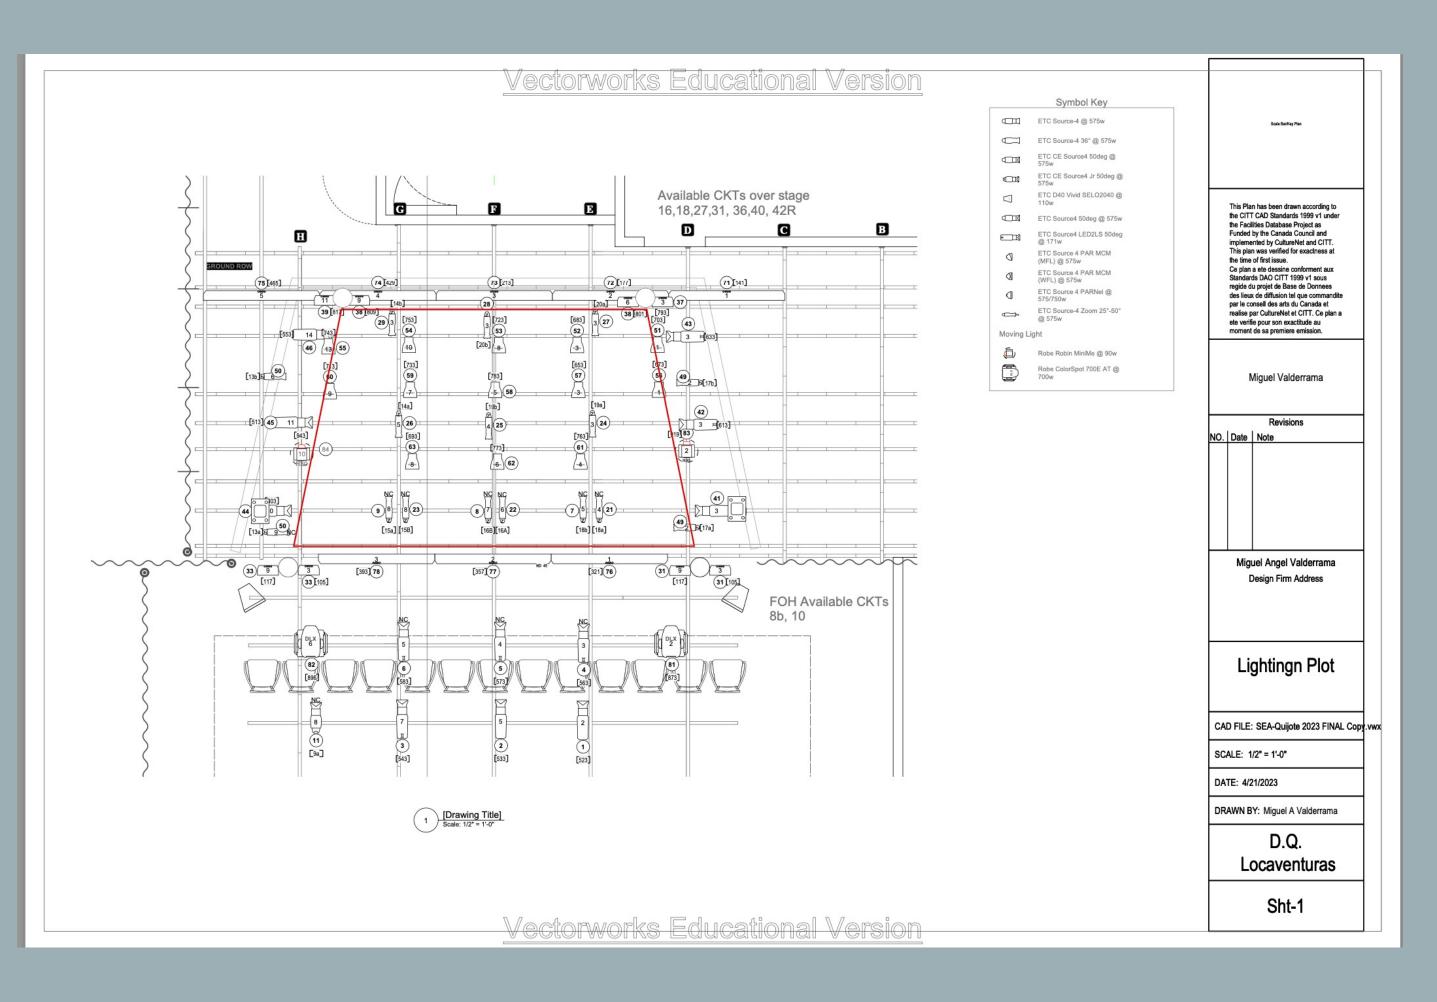

Vectorworks 2022 and Lightwright

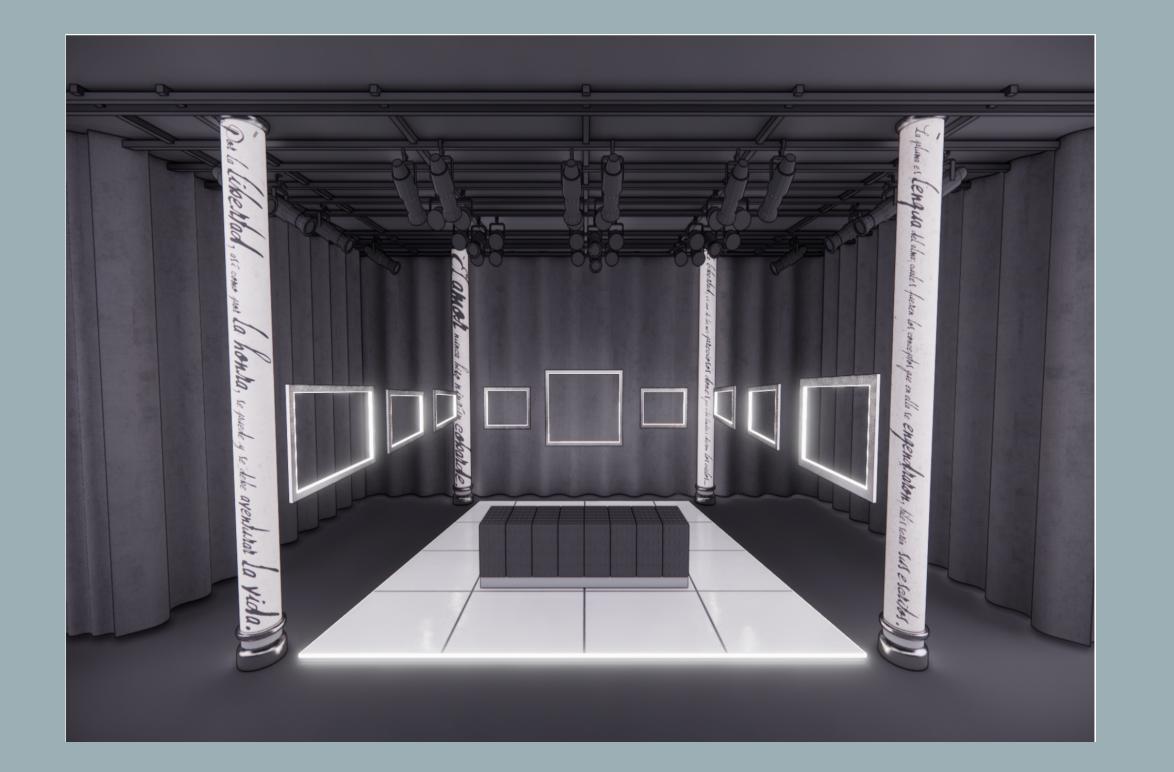

Notes

The creation of a lighting design for a theater piece that involves music as well. Also, this play is meant to tour and special considerations will have to be taking in account for this.

	Sat	11	Tech ?			Tech/ Notes		Miguel		
	Sun	12	Dress Rehearsal	All Cast	11:00 AM			Daniella		
	Mon	13	Preview	All Cast						
	Tue	14	OPENING!	All Cast						

Production Process

Meeting with the Director and Design team,
Review scenery design and other elements
that involve lighting, Research technical
elements/devices to be purchased such as
LED tape and controllers, re-hung, circuit,
patch, and focus and color existing lighting
fixtures, set up and test any lighting
equipment purchased particularly for this
production, program the show during tech
week and deliver proper paperwork for the
show to go on tour

Conclusion

I really enjoyed working with Professor Miguel. I learned firsthand the design process from beginning to end. I really enjoyed making color pallets and focus palettes. I especially enjoyed learning and using LED tape as I had never worked with it before. The LED tape we used was very simple and just lit up white. I am extremely grateful to Professor Miguel for giving me the opportunity to assist him on this wonderful show!
