A look at People, Organizations and Ideas for Social Change

—

This is a booklet on social change, and the people, organizations and ideas that were, and are, instrumental in generating forward movement. Our class voted on topics. Some of the information was well known to us, but other information was not familiar at all. This booklet also served as a typography assignment, in which we learned how to create paragraph styles, character styles, and Parent pages while researching images and creating layouts using a grid with consistent design elements.

It was not easy!

The design training for this booklet took place over several weeks. We viewed demonstrations in the classroom. We participated in critiques. We asked questions, took notes, offered feedback, and worked hard. We hope you enjoy the results.
