

Bronx, NY

December 2012

Kings County Hospital Center
451 Clarkson Avenue
Brooklyn, NY 11203

To Whom It May Concern:

As a level one trauma center hospital that serves a large population in Brooklyn, this would be a great place to hone in the knowledge and skills I've learned and grow in the nursing profession. I would like to apply as a staff nurse at Kings County Hospital Center.

My qualifications are based upon a unique blend of education, skills, and work experience. I am currently enrolled in the RN to BS program in NYC College of Technology; the same school that has shaped my educational background in the associate program a few years ago. Currently I work for the Board of Education as registered nurse for the pediatric community. I previously worked at Regency Extended Care Center in the medical/surgical unit. There I took care of the long and short term patients at the facility. I also oversaw the work of the LPN's and CNA's. At Summit Camp, I dealt with many medical problems such as anaphylaxis, fractures, seizures from the full moon or heat, medication toxicity (ex: lithium), Norovirus out break, Fifth disease, and asthma attacks. It was a fun environment in which I was able to use many nursing skills in pediatrics and med-surg to provide holistic care. From there I was able to cement myself as a flexible and reliable team member. My passion to help the youth in the community has brought me to the community center in my neighborhood. Here I hope to instill the value of education by assisting with homework and difficult subjects during the after school program. I also participate in the fun activities such as volley ball and tennis to help promote team work and exercise.

My resume is attached for further consideration. I am eager to meet with you to discuss possible employment with in Kings County Hospital Center. I may be reached addressor by way of email at: egeorge3030@gmail.com. I look forward to hearing from you.

Respectfully yours,

Eguolo George
