Objectives: To use the knowledge I have obtained as an Electrical Engineer student to help an R&D team of fellow engineers develop the next innovative piece of technology.

Education: NewYorkCityCollegeofTechnology (CUNY)
B.Tech in Electrical Engineering Technology
January, 2016, GPA 3.5 overall

Courses involved working with oscilloscope, function generators, and Digital Multi-meters

Programed micro-controllers, for example: Basic Stamp using the P-basic language and Microchip Uno 32 using C programming language.

Honors: Dean's List twice
Member of the Black Male Initiative (B.M.I)

Related Work: **Bombardier Transportation**, Pan Am Road, Jamaica, New York, 02/2014 – 05/2014
Engineer Intern
o   Used Microsoft Excel to graph the train track mapping data;
o   Updated technical manuals used by Engineers;
o   Wrote an engineer report on loop splice maintenance;
o   Comparative report between two softwares that were being considered to replace the out of date software being used to track the Air Train and track switching.

Activities: **Black Male Initiative,** Mathematics Tutor
o   Remedial Mathematics;
o   Algebra & Trigonometry;
o   Differential Calculus.
