- Objectives:** To use the knowledge I have obtained as an Electrical Engineer student to help an R&D team of fellow engineers develop the next innovative piece of technology.
- Education:** NewYorkCityCollegeofTechnology (CUNY)
B.Tech in Electrical Engineering Technology
January, 2016, GPA 3.5 overall
Courses involved working with oscilloscope, function generators, and Digital Multi-meters. Programming micro-controllers: like the Basic-Stamp using the P-basic language and Arduino UNO32 using C programming language.
- Honors:** Dean's List twice
Member of the Black Male Initiative (B.M.I)
- Software used:** Proficient in: Microsoft Word, Excel and Power Point, Matlab, Multisym, Basic Stamp Editor, MPIDE compiler, MPLAB, AutoCAD (computer aided drawing).
- Related Work:** **Bombardier Transportation**, Pan Am Road, Jamaica, New York, 02/2014 – 05/2014
Engineer Intern
- Used excel to graph the train track mapping data;
 - Updated technical manuals used by Engineers;
 - Wrote an engineer report on loop splice maintenance;
 - Comparative report between two softwares that were being considered to replace the out of date software being used to track the Air Train and track switching.
- Activities:** **Black Male Initiative**, Mathematics Tutor
- Remedial Mathematics;
 - Algebra & Trigonometry;
 - Differential Calculus.
