Consolidated Edison Company of New York  
Control System Engineer  
4 Irving Place, 15th Floor South  
New York, New York 10003

Dear Consolidated Edison Company of New York,

While recently visiting the [www.coned.com](http://www.coned.com) website, I found that you are looking to hire a Control Systems Engineer who is able to analyze, design and apply electrical controls for substations and generating stations. The work and studies that I have experienced as an electrical engineer graduate helped me prepare for this position in Control System Engineering. I would really look forward into joining and working with the worlds largest energy supplying company as it will help me grow as an electrician, and help gain knowledge in this field.

As a Bronx Community College graduate, I've earned a 3.1 GPA in electrical engineering technology. My education as an electrical engineer has allowed me to learn the basic concepts of electronics and has provided me with good investigative and analytical first hand skills that will suit your needs as a Control System Engineer.

I welcome the opportunity to meet with you to further discuss my candidacy and will call next week to see if we can arrange a time to speak. If you would like any additional information about me contact me at [ajab193@aol.com](mailto:ajab193@aol.com). Thank you for your time and consideration.

Sincerely,  
Ali Jaber
