Natural popular
attraction.

PANTONE 2479
Leopard Skin
Tough and
adaptable skin
brown.

Summer/Spring color palette consists of savory, natural, unforgettable colors that some tend to grasp towards whether it be through makeup, clothes, interior design etc. The first five colors describe this idea of reflection that was in my head for the physical board, which was a bit difficult to transfer to paper. “Cashmere White”, was an essential reflective color from a picture that inspired this idea and “Walking on Eggshells”, as well as “Dark Green Army” were the colors of the background. As for “Lilac Night Charm”, “Beige Madness” and “Nudie Patootie”, they describe a light feeling and fluid movements, different than the “Sahara Dark”, “Gray Scale”, “Leopard Skin”, and “Mid-Knight Purple”, which depict different types of textures. These hues go from light, soft, creamy and airy to dark, heavy and no transparency to the eye but conspire bold ideas of what these darker colors could be.
