

Largest household debt after mortgages: student loan debt

STUDENT LOANS ARE KILLING AMERICANS

More than **44 million** Americans have student debt

In the United States college students own \$1.73 trillion in student loans, this makes it one of the larger consumer debts. \$37,000 in student debt is the average that every student graduates with. High student debt and defaults create a burden for student borrowers, lowering credit scores and making it more difficult to buy a house or achieve financial independence. 53% of millennials have not bought a home because student loan debt either disqualified them or made it impossible to afford a mortgage... 52% of students who had taken on student loan debt did not feel it was worth it

Not sure how to pay

What To Do?

If you feel that you can't pay for college, take a break and find a job

Search for scholarships asap
Scholarships, unlike student loans, don't have to be paid back!

Go to a community college is one of the best options to because it is cheaper

Apply for Federal Student Aid

Start researching for scholarships
