ENT 4499 Submission Requirements
September, 2019

For grading purposes, by the end of the semester, in each student's ENT 4499 ePortfolio, it is required to upload all these documents as follows:

- Project Proposal (including budget, calendar etc.)
- Poster (PDF)
- Slide show of one's presentation (PDF)
- Project reflection (1.5 - 2 pages, single spaced. This needs be more detailed than what is in the "Conclusion" on one's poster).

In case students are not being able to include any of the documents mentioned above, they must discuss it with their technical and faculty advisors in advance. Once the advisors approve of the reason(s), the students must state the reason(s) in their ePortfolio in writing. This way, there will be no questions raised about any missing documents/files.

In addition, depending on students' field such as game design and video production, they may be also required to upload or link their final product to their ePortfolio.
