#### Ezequiel Salvatierra Culmination Proposal Revised 1/30/2020

#### **Project Description:**

When I came to City Tech I had the intention of working as a video editor. Little did I know that in my time at this college I'd learn so much about the different fields within the entertainment industry and that I'd completely change what I want to do for my career. It took me awhile and a summer internship at Celebrate Brooklyn to realize that what I'd love to do is work in the field as an Audio Designer, Tech, and Mixer for live events. I've learned so much about audio within my classes and my internship that I feel I'm prepared to put my knowledge to the test and coordinate the sound aspects for a live show. Being the Sound Coordinator for the ESports event will be a great opportunity for me to do just that.

#### **Methods:**

For the sound system I'd like to keep it as simple as possible without losing any flexibility to add things if anything changes and still with the best functionality. I'd have to work very directly with video to coordinate on how they are taking their video from the console systems and streaming it out. I'd also have to make sure we can give the video team a mixed output with the vocals from all the commentators and any other inputs we have. Ideally I'd like for there to be an individual who monitors the house audio mix and another person who monitors the livestream mix each on their own consoles to make sure both are getting the best mix possible.

We're also thinking about doing pre-recorded video interviews on the players this year so I'd have to coordinate with the video team to get clean sound during those interviews. We'd also have to build in a playback method into our sound and video systems together so that they work in sync with each other and we can easily select the different clips as needed.

Overall my responsibilities would be to manage all sound related aspects and details for the live show, the player interviews, and the qualifier match streaming/recording. This would include, but not be limited to, coordinating with the project manager and sound tech production team to schedule the people necessary for installation, run, and strike of the live show as well as, if needed, any people for the interviews and qualifying match streams. For the live show I'd have to also ensure that we have enough comms to enable communication between all the crew members that need them.

Aside from running the show it would also be interesting to use SMAART to compare the original audio source signal to the system's output to the theater and the audio sent to the stream. As we'll be using a lot of adapters to get the video and audio from the console to both the audience in the theater and on the live stream it would be interesting to see if there's any delay or loss of quality on either of our outputs.

# **Project Deliverables:**

- Full equipment list
- Sound system signal flow diagram
- Input and output lists
- Stage plot
- Calendar and Crew Call Schedules
- SMAART Report

## **Schedule/Calendar:**

| Dates (Deadline) | Task  |
|------------------|---|
| 2/21/2020        | Have an initial system design   |
| 4/1/2020         | Have a finalized system design  |
| 4/3/2020         | Have finished all the video clips and start preparing them for playback |
| 4/15/2020        | Have all sound playback tracks/devices ready and finalized              |
| 5/4-5/7          | Have a full tech of the show  |
| 5/8/2020         | The night of the show   |
| TBD              | Post-mortem   |
| TBD              | Culmination presentation  |

## **Required Resources:**

- An equipment list of the things we have in our department.
- Access to the theater space to test out the system as it gets designed.

## **Budget:**

| Estimated Personal Bu | dget | Estimated School Budget |     |  |
|-----------------------|------|-------------------------|-----|--|
| Culmination Poster    | \$30 | TBD                     | TBD |  |
| TBD                   | TBD  | TBD                     | TBD |  |
| TBD                   | TBD  | TBD                     | TBD |  |
| TBD                   | TBD  | TBD                     | TBD |  |

## **Proposed Table of Contents:**

- Introduction
- Methods
  - Designing the system
  - Difficulties faced
- Project Budget Estimate vs. Actual
- Project Calendar Estimate vs. Actual
- Paperwork and Deliverables
  - o List of all equipment used
  - Sound system signal flow diagram
  - Input and output lists
  - Stage plot
  - Calendar and Crew Call Schedules
  - o SMAART Report
- Conclusion
- Annotated Bibliography
