

Typography Tools / M. Giuliani

Technique: Touch Type Tool / Illustrator

The Touch Type Tool allows you to make changes to individual characters within a word (larger text box), without having to type them individually.

You can find the **touch type tool** in the CHARACTER window or the tool bar.

If you do not see the Touch Type Tool, go here

Select the tool, then you can go over a specific character for adjustments. The text will remain in one text box, which is still editable

A large blue text box containing the word "HELLO" in a bold, black, sans-serif font. A small icon of the Touch Type Tool (a square with a crosshair) is positioned over the letter "L".
